The net asset value of the Company was steadily growing for the last 5 years. The annual rate of growth was: 2003 – 15%, 2004 – 24%, 2005 – 3%. As of the beginning of 2006, the net asset value exceeded the level of 2001 by 1.5 times. The basic factor which contributed to growth of net assets was growth of undistributed profits of the Company.

Decrease in the net asset value as of 31.03.2006 was caused by the following basic factors:

1) transfer of a portion of OJSC MMC Norilsk Nickel's property according to the separation balance sheet of OJSC Polyus Zoloto created by means of separation from OJSC MMC Norilsk Nickel pursuant to the Decision of Extraordinary General Meeting of Shareholders dated September 30, 2005 on the Company reorganization.

2) losses associated with recognition in the operating expenses for Quarter I 2006 of the expenses associated with retirement of own shares acquired and bought out from shareholders pursuant to the Decision of Extraordinary General Meeting of OJSC MMC Norilsk Nickel Shareholders dated February 17, 2006.

The borrowed funds-to-capital and reserves ratio value was within the range from 43.53 to 48.6 for the last 4 years. An insignificant increase of such ratio in 2005 was basically caused by the increase of debts to the participants and founders in terms of income payment in connection with intermediate distribution of dividends based on the decision of Extraordinary General Meeting of Shareholders dated December 30, 2005. For the same reasons, there was increase in the amount of short-term liabilities per unit of the capital and reserves from 36.7% to 40.28%.

In Quarter I 2006, in view of the decrease in the net asset value of the Company, the value of the ratios – borrowed funds and short-term liabilities per unit of the capital and reserves – grew up to the values of 56.9 and 46.59 respectively.

In 2005 the coverage ratio of payments on debt servicing reduced from 0.22 to 0.13 as compared to the level of 2001. In Quarter I 2006, the ratio has a negative value due to losses caused by retirement of own shares acquired and bought out from the shareholders (see above).

The level of debts in arrears dramatically reduced from 28.29 to 1.23 for the last 5 years (as of 31.03.2006).

In general, the debtors' turnover has had a positive trend for the last 5 years. In this connection, it is required to be noted that increase in the debtors' turnover occurs against the background of a steady growth of proceeds, which is a proof of a well-balanced approach for selecting conditions of settlements with customers.

The dividend payout ratio in revenues for 2005 includes information on intermediate distribution of dividends for 9 months of 2005.

The efficiency of labor steadily grows during the whole period, which is basically due to growth of proceeds in the Company.

The ratio of depreciation on volume of proceeds gradually decreases starting from 2002. Slow rates of reduction of depreciation while there is a continuous growth of proceeds are indicative of continuous replacement of depreciated fixed assets of the Company.

Thus, during the last five years, the indicators of OJSC MMC Norilsk Nickel characterizing its business activity have a steady positive trend and are indicative of a fairly high level of paying capacity, low credit risks and financial security of the Company.

2.3.3. Liabilities of the Issuer under security provided to third parties

As of March 31, 2006 total liabilities of the Issuer under provided security and total third party liabilities secured by the Issuer (by collateral or guarantee) showed 36,599 mln Rubles.

During the reporting period, the following liabilities representing more than 5% of the balance sheet assets were executed:

1. Amount of the Issuer's secured liability – *Credit facility amounting to 400,000,000 US dollars;*

Period of the secured liability discharge - *29.11.2008;*

Security method – *collateral of rights for Dollar and Ruble accounts;*

Amount of security – *600,000,000 US dollars;*

Subject of collateral – *rights under Account Agreements (Dollar and Ruble) for cash assets on the Issuer's accounts opened with Bank Societe Generale East, a commercial joint-stock bank (ZAO);*

Security provision period – *until the Issuer has completely discharged the liabilities under the credit facility;*

Assessment of the risk of non-discharge or improper discharge of the secured liabilities – *refer to Section 2.5.3. Financial Risks.*

2. Amount of the Issuer's secured liability – *500,000,000 US dollars;*

Period of the secured liability discharge - *30.09.2009;*

Security method - *guarantee;*

Amount of security – *amount of the responsible Guarantor is limited to the amount of 500,000,000 US dollars under the Trust Agreement plus all accrued interest, penalties, fees, expenses and other amounts payable by the Issuer subject to the Trust Agreement;*

Subject of collateral – *unconditional and irrevocable contractual guarantee of OJSC MMC Norilsk Nickel (Guarantor) under the Trust Agreement provided in favor of DEUTSCHE TRUSTEE COMPANY LIMITED (Trustee) to secure the liabilities of NORILSK NICKEL FINANCE LUXEMBOURG S.A. (Issuer) with regard to issuance of debt bonds in the amount of 500,000,000 US dollars;*

Security provision period – *the Guarantee validity period under the Trust Agreement is limited to the date of complete discharge by the Issuer of its liabilities under the Trust Agreement. If any bonds are not repaid, or bought out and cancelled by the prescribed date, such bonds shall be repaid according to their principal amount on September 30, 2009. In this connection, the Guarantor's liabilities shall and will remain in force until all the liabilities under the Trust Agreement have been paid;*

Assessment of the risk of non-discharge or improper discharge of the secured liabilities – *given that NORILSK NICKEL FINANCE LUXEMBOURG S.A. being an affiliate of OJSC MMC Norilsk Nickel granted to the latter a loan in the amount of 498,300,000 US dollars for a period of 5 years, the risk of non-discharge of the secured liabilities is insignificant.*

2.3.4. Other liabilities of the Issuer

The Issuer has no other liabilities.

2.4. Purpose of the Issue and Application of Issue Proceeds

Fifth issue securities.

Securities were issued within the framework of restructuring "Norilsk Nickel" Company. RAO "Norilsk Nickel" as capitalization centre was replaced by MMC Norilsk Nickel through the additional issue to shareholders of RAO "Norilsk Nickel" of shares in MMC Norilsk Nickel payable by shares of RAO "Norilsk Nickel".

No ordinary shares of the issue were payable in cash. Ordinary and preference shares of RAO "Norilsk Nickel" were recorded on balance sheet of OJSC MMC Norilsk Nickel.

2.5. Risks Affecting Investments in Issued Regular Securities

Risk factors described below may affect business operations of MMC Norilsk Nickel. Such risks may materially affect the Company's operations, sales, profit, assets, liquidity and capital resources and should be considered in conjunction with any estimates and projections presented herein. Furthermore, certain risks presently deemed immaterial may become material.

2.5.1. Industry risks

OJSC MMC Norilsk Nickel is the world leading producer of palladium and nickel, a major producer of platinum and one of the world 10 major copper producers.

The prices of metals produced by OJSC MMC Norilsk Nickel and the world demand substantially depend on the world economy growth. The Company's financial standing is directly affected by the prices of such metals.

The Company is also subject to the risk of metal price fluctuations as most of sales proceeds are received under long-term contracts for physical delivery of fixed metal quantities at priced tied to delivery periods.

Risks of possible changes in prices of raw materials purchased by the Company are minimum as the Company employs its own sources of raw materials, the share of purchased raw materials being insignificant. Additionally, long-terms contract for delivery of such raw materials exist.

The Company also runs a minimum risk of changes in prices of contractor services in non-ferrous and precious metal concentrate processing, making of finished products with enhanced consumer's effect of processed metal, transportation and insurance of concentrate and finished metal as:

- such services are performed under long-term contracts at fixed prices providing for required profitability;*
- alternative contractors may be engaged.*

2.5.2. Country and region risks

Business operations of any company including OJSC MMC Norilsk Nickel are subject to a number of political and economic risks. Typical features of today's Russian economy are currency control, low liquidity on capital markets and continuing inflation.

Stability and further development of Russia's economy are strongly dependent on the efficiency of the economic policy implemented by the Government.

Business operations of OJSC MMC Norilsk Nickel might be affected by severe weather conditions of the Far North and any circumstances of Force Majeure. Delivery of materials and products might be suspended by adverse weather. Major power supply failures, accidents at mines, concentrating mills and metallurgical works might have an adverse effect on the Company operations.

Within its range of influence the Company continuously focuses on the limitation of possible effects of such adverse changes. To this end efforts are made to establish long-term relations with regional authorities aimed at the efficient and broad-gauge economic development; all-round development of social partnership taking into account ideas of the Company employees; accumulation and maintenance of sufficient material and technical resources in hard-to-reach areas; minimization of damage caused by stream-ice and floods.

2.5.3. Financial risks

The bulk of the Company's sales are denominated in US Dollars whereas most of its expenses are paid in Russian Rubles. Therefore, the Rubles-to-Dollar rate increase might adversely affect the Company's financial results. For the Company this risk is partially reduced on account of negative correlation of prices for produced metals and the ruble rate of exchange.

The risk of interest rate changes results from interest rate fluctuations which may adversely affect the Company's financial results. This risk is now insignificant for the Company due to a low level of the Company indebtedness and a high level of fixed rate indebtedness.

Credit risk results from the possibility of a counterparty's failure to promptly meet its liabilities to the Company giving rise to financial losses. OJSC MMC Norilsk Nickel minimizes credit risk through distribution among a larger number of counterparties.

Price risk is a risk of possible losses due to influence of revaluating open items in respect to produced metals. Due to fluctuations of prices for produced metal products, the Company is subject to price risks, which may also adversely affect the Company proceeds.

Liquidity risk might result from the Company's incapacity to pay its liabilities when due. For liquidity management, OJSC MMC Norilsk Nickel forms a reserve of liquid funds sufficient for compensation of possible fluctuations in receipt of proceeds taking into account price, currency and interest risks.

2.5.4. Legal risks

The bulk of the Company's sales are denominated in US Dollars. Therefore, any amendments in exchange regulations might affect the Issuer's financial results.

Presently investments in the Company's regular securities are not subject to risks connected with tax law of the Russian Federation.

No risks resulting from the change of licensing requirements to the Issuer's core operations or licensing the right to exploit limited resources (including natural resources) can presently be identified.

No risks can presently be traced of changes in judicial practice on matters relating to the Issuer operations (including licensing) which might adversely affect its business results and the outcome of pending proceedings of which the Issuer is a party.

2.5.5. Business risks

No risks arising from pending proceedings of which the Issuer is a party can presently be identified.

Nor are there currently any risks of non-extension of licenses for any of the Issuer's operations or exploitation of limited resources (including natural resources).

Total liability of the Issuer under third party commitments including those of subsidiaries cannot significantly affect the Issuer operations.

The Company has no customers accounting for at least 10 per cent of total sales revenue. The Company is not economically dependent on a limited number of customers since all products manufactured by OJSC MMC Norilsk Nickel may be sold on commodity markets.

Information on proceeds from sales of products (works, services) has been prepared in accordance with the Russian Accounting Standards "Income" approved by Order of the Ministry of Finance of the Russian Federation dated 06.05.1999 No. 32n, and the accounting policies of the Company.

In 2005 the world market prices and, consequently, the actual selling prices in respect to all basic metals, other than palladium, significantly exceeded the price levels of prior years.

The structure of cost of goods manufactured by periods is presented in the form of a structure of cost of goods manufactured with regard to core business products which are 82-85% of the total costs of the Company.

The core business activities of the Company include: production of multicomponent ore, concentration of non-ferrous metal ores, production and sales of non-ferrous, precious and rare-earth metals. The Company has a developed base of servicing production.

Based on the presented cost structure, the most specific weight relates to the costs for labor remuneration with benefits-related deduction (31-35%), production services (20-21.5%), expenses for raw and other materials (15-19%).

Reduction in expenses for purchased raw materials is caused by reduction of throughput of different metallic raw materials.

There is a significant decrease in the share of taxes included in production costs, from 12% to 3%, reduction of taxes also occurred in the absolute amount. Reduction of taxes is accounted for by changes in the laws in respect to defining the taxable base, the basic influence was made by: natural resources tax, road tax.

Increase in energy consumption (from 1.2% to 12.8%) and, therefore, reduction of expenses for fuel (from 4.3% to 2.7%) is caused by the fact that the Company has undergone a restructuring resulted in separation of the power facilities from the Company on the basis of a legal entity. The costs of the power facilities were previously accounted as part of the relevant elements; after restructuring, the energy products are consumed by the Company to produce goods, works, services at scheduled rates.

The structure of cost of goods manufactured has been presented based on the data of the financial statements which were prepared according to the Instruction for completing Form No. 5 of federal state statistical monitoring and the accounting policies of the Company.

3.2.4. Materials (supplies) and suppliers

The Company's sources of raw materials include sulfide copper-nickel ore deposits exploited by the Polar Branch of OJSC MMC Norilsk Nickel. The share of purchased raw materials is insignificant. No raw materials are imported.

During the period under review the Company had no suppliers accounting for more than 10 per cent of total material supplies.

The price increase for Quarter I 2006 by more than 10 per cent as compared to the same period of the previous year was noted in respect to the following groups of materials: oil products, tires, refractory materials and nonferrous mill products.

During the period under review 85.7% of materials and supplies was purchased on domestic market and 14.3% imported.

The forecast of availability of foreign material and supply sources is favorable; in case of any turn in the market alternative sources will be located offering the best price and quality terms.

3.2.5. Issuer market

Nickel market

Primary nickel producers — Russia, Canada, Japan, Australia, New Caledonia, Norway.

Major nickel consumers — Japan, USA, China, Germany.

In Quarter I 2006 the world nickel market showed a growing demand by fabricators of stainless steel and special alloys and activation of speculative demand for metal which led to price increase. During the quarter a constant reduction of the world commodity exchange reserves was recorded. The nickel price grew in Quarter I 2006, the quarter's average price of London Metal Exchange (LME) being 14,811 USD per t against 12,628 USD per t in Quarter IV 2005 (a 17.29% growth).

Key nickel markets — EU, Japan, USA, People's Republic of China, Taiwan, Korea.

Copper market

Primary refined copper producers — Chile, China, Japan, USA, Russia.

Major consumers — China, USA, Japan, Germany.

The growth of copper prices also continued in Quarter I 2006. While retaining a stable demand, there was noted a rising investment interest on the part of speculative funds. The worldwide growth of copper production led to increase in total commodity exchange reserves but they remained on a relatively low level. The Quarter's average LME copper price was 4,944 USD per t compared with 4,297 USD per t in Quarter IV 2005 (a 15.06% growth).

PMs market

Primary PMs producers — South Africa, Russia, USA, Canada. The PMs market is basically influenced by South Africa and Russia.

Major consumers — USA, Japan, China, Western Europe.

In Quarter I 2006, despite circulating information on sales from the State Fund of Russia, the world palladium market showed increase in speculative demand for metal resulting in price increase during the period under review. There is oversupply in the market. Starting from March 2006, the price steadily exceeded 300 USD per ounce, and the quarter's average palladium LME price was 291.42 USD per ounce against 238.50 USD per ounce in Quarter IV 2005 (showing a growth of 22.19%).

The world speculative demand for platinum continued its growth in Quarter I 2006. The metal price showed a steady growth, its fluctuations depending generally on the rate of Dollar to other major currencies. The Quarter's average platinum price on London market increased to 1037.33 USD per ounce from 956.82 USD per ounce in Quarter IV 2005, i.e. by 8.41%.

Key markets — EU, USA, Japan.

The markets of OJSC MMC Norilsk Nickel may be adversely influenced by the world market changes (high volatility of exchange prices), implementation by competitors of major mining and metallurgical projects and development of new highly efficient technology. To prevent possible adverse influence of market fluctuations

the Company performs continuous monitoring and review of the world market and competitor operations including the identification of the most advantageous markets, acquisition of new businesses and highly profitable deposits, expansion of long-term direct sales, entry in new consumption areas, cost reduction and manufacture of high value added products.

a) Mineral resources

Producing Assets of MMC Norilsk Nickel

Deposit/Mine	Mine type	Ore⁽¹⁾
---------------------	------------------	--------------------------

Polar Branch		
Oktyabrskoye ore deposit		Copper-nickel sulphide
"Oktyabrski"	Underground	High-grade, cupreous, disseminated
"Taimyrski"	Underground	High-grade
Talnakhskoye ore deposit		Copper-nickel
"Talnakhskoye" Mine Group ⁽²⁾		
"Komsomolski"	Underground	Cupreous and disseminated
"Mayak"	Underground	Disseminated
"Skalisty"	Underground	High-grade
"Norilsk 1" ore deposit		Copper-nickel sulphide
"Medvezhi Ruchi"	Open-cut	Disseminated
"Zapolyarny"	Underground	Disseminated
Kola GMK		
"Zhdanovskoye" ore deposit		Copper-nickel sulphide
"Tsentralny"	Open-cut	Disseminated
"Severnoy-Gluboki"	Underground	Disseminated
"Zapolyarnoye" ore deposit		Copper-nickel sulphide
"Severnoy"	Underground	Disseminated
"Kotselvaara and Semiletka" ore deposit		Copper-nickel sulphide
"Kaula-Kotselvaara"	Underground	Disseminated

Notes:

- (1) High-grade ore is high in non-ferrous and precious metal content while cupreous ore has a high copper-to-nickel ratio.
- (2) The "Komsomolski" mine is mining ore at the "Talnakhskoye" ore deposit and in the western part of the Oktyabrskoye ore deposit.

Seven mines of the Polar Branch produce sulphide copper-nickel ores at the Oktyabrskoye, Talnakhskoye and Norilsk 1 ore deposits. Ores of different value contain nickel, copper, cobalt, platinum, palladium, gold and other useful components.

The Kola GMK mines ore at the Zhdanovskoye, Zapolyarnoye, Kotselvaara and Semiletka ore deposits. At 4 mines of the Kola GMK, sulphide disseminated ores containing nickel, copper and other useful components are produced.

Ore and mineral deposits as of December 31, 2004 are given as certified by the independent audit performed by Micon International Co. Ltd. The audit was carried out according to internationally accepted principles of the Australasian Code for Reporting of Identified Mineral Resources and Ore (JORC Code).

In addition to the audit of non-ferrous metal reserves of the Talnakhskoye ore cluster (Taimyr Peninsula) and the Zhdanovskoye ore deposit (Kola Peninsula), an audit of non-ferrous metal reserves of the Norilsk-1 ore deposit (Taimyr Peninsula) and platinum-group metals of the Talnakhskoye ore cluster and the Norilsk-1 ore deposit was carried out during 2005. Inclusion in the audit of platinum-group metals became possible due to changes in the Russian laws. Information on platinum-group metal reserves include data on the reserves of platinum, palladium, rhodium, ruthenium, osmium and iridium.

Information on platinum-group metal content at the ore deposits developed by the Company was disclosed for the first time in history of OJSC MMC Norilsk Nickel in February 2006. The Company has carried out a serious and continuous work so that publication of information on platinum-group metal reserves becomes possible. This is an important stage in series of actions performed by MMC Norilsk Nickel aimed at ensuring transparency expected by investors, customers and the mining and metallurgical community in general, which would allow for more accurate assessment of the Company competitive ability and mineral resources base longevity.

In the course of the audit Micon International reviewed all aspects of the estimation of reserves of the mentioned ore deposits such as geological survey including the methods of geological data collection and deposit location by drilling and sampling as well as the methods of reserves estimation and classification. The auditor interviewed officers in charge of every mine and every unit involved in the audit and inspected operating mines, ancillary geological facilities and analytical laboratories. Micon also studied drilling techniques and relating equipment, the core log and sampling techniques, methods of chemical analysis and quality control applied to check the drilling sample database. Micon thoroughly inspected reserve estimation

logs and techniques metal volume and content estimation and checked some of the estimates. No material differences between the results and the Company's accounts were discovered.

Notes:

(1) The Talnakhski ore cluster and the Norilsk-1 ore deposit on the Taimyr Peninsula and the Zhdanovskoye ore deposit on the Kola Peninsula were classified according to the principles of the Australasian Code for Reporting of Identified Mineral Resources and Ore (JORC Code) developed by

the Joint Ore Reserves Committee of the Australasian Institute of Mining and Metallurgy, the Australian Institute of Geoscientists and the Minerals Council of Australia (JORC). The competent specialist responsible for the classification: Stanley C. Bartlett, PGeo, Managing Director of Micon International Co Limited. The reserves data is derived from the current 2-3 year mining plan and the basic mining concept scenario to the expiry of the mines' depletion period determined based on the cost-effective extracted ore reserves relating to the Russian A, B and C1 grades as of the end of the calendar year. The audit did not take into account ore and mineral resources of "Zapolyarnoye", "Semiletka" and "Kaula-Kotselvaara" deposits on the Kola Peninsula and "Severny" underground mine. The audit did not either take into account platinum-group metal reserves of the Zhdanovskoye ore deposit on the Kola Peninsula.

- (2) *The figures in the "Total" lines may differ from the sum of components due to rounding. Individual figures in some cases may slightly differ from those which were previously disclosed.*
- (3) *6PGM means platinum, palladium, rhodium, ruthenium, osmium and iridium.*
- (4) *No proved and probable ore reserves are included in mineral resources.*
- (5) *Includes ore reserves and mineral resources of "Severny-Gluboki" underground mine and "Tsentralny" open-cut ore mine comprising "Tsentralnaya" and "Zapadnaya" mines.*

Licenses for natural resources utilization held by the Issuer, its subsidiaries and affiliates:

OJSC MMC Norilsk Nickel and OJSC Kola GMK

Number: ***PTZ 11381 BP***

Date of issue: ***January 21, 2003***

Valid to: ***December 31, 2007***

Licensed operations: ***Exploration and evaluation of platinum metal and gold deposits within the Loukhskaya Area (Karelia).***

Grounds for issue: ***Resolution of the Russian Ministry of Natural Resources dated December 30, 2002 No. 518-r approved by the Government of the Republic of Karelia.***

Deposit area description. ***The licensed site is situated in the eastern part of the Loukhski District, Republic of Karelia and has a mine claim status with a 300 m depth limit. The site area is 1,443 sq km. No exploration of metal deposits have been earlier performed, the possibility of gold-platinoid and copper-nickel manifestation was forecast by mathematical methods. No undiscovered potential resources have been identified.***

Responsibilities of the Issuer:

1. ***The geological prospecting project shall be prepared and approved by July 1, 2003.*** Executed.
2. ***Geological prospecting shall be started by September 1, 2003.*** Executed.
3. ***The commercial precious metal manifestation shall be located by December 30, 2004.***
4. ***Evaluation of discovered deposits shall be completed by December 30, 2006.***
5. ***The final report on calculation of C₂ grade reserves and P₁ grade resources shall be presented for state appraisal by September 30, 2007.***

Geological exploration: ***Laboratory work. Office processing of obtained data.***

Recurring payments ***for the use of natural resources are charged according to applicable tax law and law on mineral resources.***

Licensed operations: **Ore mining at Oktyabrskoye copper-nickel ore deposit**

Grounds for issue: **decision of the Governor of the Taimyr Autonomous District and the authorized representative of the Russian Ministry of Natural Resources on the conversion of License No. DUD 00075**

based on paragraph 12, Article 10¹ and Part IV, Article 17¹ of the Law of the Russian Federation "On Mineral Resources".

Deposit area description: *mineral resources consist of sulfide copper-nickel ore containing precious metals extracted by the underground mining method at "Oktyabrski" mine (high-grade and cupreous ore); "Taimyrski" mine (high-grade ore); "Komsomolski", "Zapad" mine (cupreous ore). The State Reserves Balance (Minutes No. 7542 of the USSR State Reserves Committee, 1975) records nickel, copper, cobalt (primary raw material), platinum, palladium, rhodium, osmium, iridium, ruthenium, gold, silver, selenium, tellurium and sulfur all of which are extracted from the ore.*

Possibility of and reasons for license renewal: *subject to the mines' capacity and planned processing volume the reserves of copper-nickel ore at Oktyabrski deposit go beyond the term of this license which may be extended for the depletion period or other period specified by then applicable law.*

Ore output *depends on the level of non-ferrous and precious metal consumption, prevailing prices, mines' capacity, condition of rock in place and mining safety considerations.*

In 2005 output *of sulfide copper-nickel ore was 9,172.3 thousand t.*

Responsibilities of the Issuer: *to limit as far as possible selective mining of the most efficient resources; comply with applicable standards, regulations for the protection of mineral resources, surface and subsurface water, the atmosphere, wild life; provide for conservation of resources; carry out field prospecting. The license does not specify definite periods. The Issuer continuously performs all assumed responsibilities.*

Recurring payments. *Tax on mineral resources development at the rate of 8% of the price of multicomponent complex ore components without extraction of useful components including precious metals. No payments are charged for associated enclosing rock produced for own consumption.*

Grounds for issue: *Resolution of the Russian Ministry of Natural Resources No. 492-r of November 5, 2003 approved by the Administration of the Murmansk Region.*

Deposit area description: *The licensed site has a mine claim status and is situated to the south of Monchegorsk. The site area is 39 sq km. In 1999-2000 OAO "Kola Mining and Metallurgical Company" performed PMs exploration of the area including the licensed site under License No. MUR 00460 TP (registration date — September 29, 1999, expiry date — March 30, 2003). Within the area a range of geophysical and drilling operations relating to the geological exploration stage and floatation testing of small laboratory samples were performed resulting in the discovery of a number of sites with low-sulfide platinum manifestation. At present improvement of processing flowsheets is continued. The State Reserves Balance records for the site off-balance copper-nickel ore reserves and inferred PMs reserves of several ore manifestations.*

Responsibilities of the Issuer:

1. *Preparation and approval of the operation plan by April 30, 2004. Executed.*
2. *Beginning of field survey by June 30, 2004. Executed.*
3. *Completion of the exploration stage by December 30, 2006.*

Licensed operations: *Geological exploration of the "Mountain of Generalskaya" area for copper-nickel ore and platinoids (Murmansk Region).*

Grounds for issue: *Resolution of the Russian Ministry of Natural Resources No. 491-r of November 5, 2003 approved by the Administration of the Murmansk Region.*

Deposit area description: *The licensed site has a mine claim status and is situated in the Pechengski District of the Murmansk Region near the town of Zapolayrny. The site area is 10.4 sq km. Before 2002 exploration of the was performed by Murmansk Surveying Company of SZGTU and Pechenga Integrated Surveying Company funded by the Government. The 2002 exploration was funded and performed by Pechenga Integrated Surveying Company and OJSC Kola GMK and included magnetic prospecting, IP-MG electrical prospecting, transient electromagnetic exploration, field exploration, mining operations, drilling of holes 50 m to 1,700 m deep. The exploration showed that the mountain of Generalskaya is of a fundamentally laminated type and includes 3 to 7 horizons with 0.5 m to 10 m low-sulfide platinum manifestation traced to the depth of 1,500 m. Additionally, PMs manifestation was also discovered in cross-cutting bodies represented by vein-disseminated copper manifestation presumably of the stockwork type. AO "Institute Gipronickel" tested 5 laboratory samples of the ore to determine its processing properties. Within the site undiscovered P₁ platinoid, nickel and copper resources are recorded.*

Responsibilities of the Issuer:

1. *Preparation and approval of the operation plan by June 30, 2004. Executed.*
2. *Beginning of field survey by June 30, 2004. Executed.*
3. *Completion of the exploration stage by December 30, 2006.*

Licensed operations: *Geological exploration – search and evaluation of copper-nickel ore deposits in the Yuzhno-Monchegorski area in the Murmansk Region.*

Grounds for issue: *Resolution of the Russian Ministry of Natural Resources No. 1260 of 09.12.2005.*

Deposit area description. *The licensed site is situated within the municipal formation “the town of Monchegorsk with subordinate area” in Murmansk region, 60-10 km to the south of Monchegorsk. The licensed site has a mine claim status. The site area is 257.2 sq km. The main factor determining the site exploitability is availability in its limits of large layered intrusions of ultrabasic-basic formations: the Monchetundrovki massif, the massif of lake of Ostrovski, the Umbarechenski complex massifs which are associated with copper-nickel, vanadium-containing titanomagnetite and chromite ore manifestations.*

Responsibilities of the Issuer.

1. *Preparation and approval of the exploration and evaluation project by July 1, 2006.*
2. *Beginning of geological survey by September 1, 2006.*

3. Completion of the exploration stage and report preparation by June 1, 2009.

4. Completion of the evaluation stage and presentation of the report by November 1, 2010.

Recurring payments. *Recurring payments shall be made according to the following rates: 2005 – 50 RUB per 1 sq km; 2006-2008 – 100 RUB per 1 sq m; 2009-2010 – 150 RUB per 1 sq km.*

Licensed operations: **Geological exploration – search and evaluation of copper-nickel ore and platinum-group metal deposits in the Solozerski area in the Murmansk Region.**

Grounds for issue. **Resolution of the Russian Ministry of Natural Resources No. of 09.12.2005.**

Deposit area description. *The licensed site is situated inside the “Kolski District” municipal formation of the Murmansk Region, near the township of Verkhnetulomski, 60 km to the north-east of Mount of Cola. The site has a mine claim status. The site area is 215 sq km. In the site area, massifs of basic-ultrabasic rocks have been discovered which relate to the Allarechenski, Monchegorski, Karikyavrski, Lovnoozerski and Kambaldinski (Komatiitov) ore-bearing formations. Some of them bear established copper-nickel, chromite and platinometal ore grade mineralization. The most explored area is a laminated massif in the vicinity of Lake of Solozero. The massif was explored by test hole drilling (50-180 m), has a dimension of 0.5x1.5 km in plan, is divided by fractures into three blocks, contains a scarce sulphide impregnation.*

Responsibilities of the Issuer.

1. Preparation and approval of the exploration and evaluation project by July 1, 2006.

2. Beginning of geological survey by September 1, 2006.

3. Completion of the exploration stage by May 1, 2009.

Licensed operations: **Geological exploration – search and evaluation of deposits and ore gold deposits in the Solenoozerski area in the Murmansk Region.**

Grounds for issue. **Resolution of the Russian Ministry of Natural Resources No. 1259 of 09.12.2005.**

Deposit area description. *The licensed site is situated inside the “town of Kirovsk with subordinate area”, “Lovozerki District” and “Terski District” municipal formations of the Murmansk Region and extends to the south-west of Mount of Kirovskaya for more than 90 km. The site has a mine claim status. The site area is 706 sq km. In geologic and tectonic terms, the site relates to the Western and Central Block of the Imandra-Varzugski structural and tectonic zone created by the early Proterozoic volcanogenic-sedimentary complex. The area is considered to be exploitable for search of gold due to development in this area of black-shale formations which are attributed to the most gold-bearing rocks. Within this area, direct prospecting indicators of gold mineralization have been registered – gold-sulphide, gold-quartz-sulphide, gold-antimonic-arsenic manifestations in sulphide-carbon shales.*

Responsibilities of the Issuer.

Recurring payments. *Recurring payments shall be made according to the following rates: 2005 – 90 RUB per 1 sq km; 2006-2008 – 160 RUB per 1 sq km; 2009-2010 – 270 RUB per 1 sq km.*

Number: *MUR 13436 BP*

Date of issue: *December 28, 2005*

Valid to: *December 1, 2010*

Licensed operations: *Geological exploration – search and evaluation of platinum-group metals and gold in the Shouninski area.*

Grounds for issue. *Resolution of the Russian Ministry of Natural Resources No. 1256 of 09.12.2005.*

Deposit area description. *The licensed site is situated inside the Pechenega District of the Murmansk Region at a distance of 6-15 km to the south-west of the district center – the township of Nickel and 9-10 km to the east of the state boundary with Norway. The site has a mine claim status. The exploration site area is 53 sq km. Within the Pechenega structural zone, by operations previously carried out in 1970-1994, increased content of platinum-group metals was discovered. In this area, during geochemical explorations a contrasting anomaly extending up to 13 km at a width of 1.5-3.5 km was discovered, which was associated with effusive-sedimentary formations of the Pechenega structure western side.*

Responsibilities of the Issuer.

1. Preparation and approval of the exploration and evaluation project by July 1, 2006.

2. Beginning of geological survey by September 1, 2006.

3. Completion of the exploration stage by May 1, 2009.

4. Completion of the evaluation stage and presentation of the report by October 1, 2010.

Recurring payments. *Recurring payments shall be made according to the following rates: 2005 – 90 RUB per 1 sq km; 2006-2008 – 180 RUB per 1 sq km; 2009-2010 – 270 RUB per 1 sq km.*

Number: *MUR 13537 BP*

Date of issue: *March 20, 2006.*

Valid to: *December 1, 2010.*

Licensed operations: *Geological exploration – search and evaluation of platinum, nickel and copper deposits in the North-Monchegorski area.*

Grounds for issue. *Resolution of the Russian Ministry of Natural Resources No. 215 of 20.03.2006.*

Deposit area description. *The licensed site is situated inside the Monchegorski, Kola and Olenegorski areas of the Murmansk Region. The site has a mine claim status. The exploration site area is 979 sq km. The site is located in the Monchegorski ore district with industrially significant manifestations of copper-nickel ores with low-sulfide platinum mineralization.*

Responsibilities of the Issuer.

1. Preparation and approval of the exploration and evaluation project by July 1, 2006.

2. Beginning of geological survey by September 1, 2006.

3. Completion of the exploration stage by May 1, 2009.

4. Completion of the evaluation stage and presentation of the report by October 1, 2010.

Recurring payments. *Recurring payments shall be made according to the following rates: 2006-2008 – 180 RUB per 1 sq km; 2009-2010 – 270 RUB per 1 sq km.*

Licensed operations: *Sulfide copper-nickel ore mining at the Zhdanovskoye deposit to extract nickel, copper, cobalt, sulfur, gold, silver, platinumoids.*

Grounds for issue: *decision of the Murmansk Region Administration and the Committee for Natural Resources of the Murmansk Region.*

Deposit area description: *the Zhdanovskoye deposit was discovered in 1947 and has been developed since 1959. Open-pit mining is expected to the minus 99 level after which it will be replaced by underground mining. The available reserves were approved by the USSR State Reserves Committee in 1952, 1955 and 1962. Additional exploration revealed new deposits — Bystrinskoye (1983), Tundrovoye (1986) being a geological extension of the Zhdanovskoye deposit. In 1990 a general reestimation of reserves was performed approved by Minutes No. 63 of the State Reserves Committee of the Russian Ministry of Ecology dated June 26, 1992*

resulting in a 1.8 times increase of total reserves. Nickel, copper, cobalt, sulfur, platinum, palladium, rhodium, gold, silver, selenium and tellurium reserves were approved.

Ore output *depends on the level of demand and designed capacity of the mines. 2005 output: sulfide copper-nickel ore — 4,774 thousand t.*

Responsibilities of the Issuer: *to apply state-of-the art technology, comply with applicable environmental standards and regulations, safety standards and regulations; to protect tailing dumps, spoil banks, substandard ore storage and record basic useful components contained therein; to provide for disturbed land rehabilitation.*

Recurring payments *Tax on mineral resources development at the rate of 8% of the price of multicomponent complex ore components without extraction of useful components including precious metals. No payments are charged for associated enclosing rock produced for own consumption.*

Licensed operations: *Sulfide copper-nickel ore mining at the Kaula, Kotselvaara-Kammikivi, Semiletka deposits to extract nickel, copper, cobalt, sulfur, gold, silver, platinoids.*

Grounds for issue: *decision of the Murmansk Region Administration and the Committee for Natural Resources of the Murmansk Region based on Articles 10-1 (paragraph 4), 17-1 of the Law of the Russian Federation "On Mineral Resources" and the application by OAO "GMK Pechenganickel" and OAO "Kola Mining and Metallurgical Company", Decision No. 78/90-r on conversion of License No. MUR 00322 TE dated December 24, 1998. Amendment to the license dated September 16, 2005.*

Deposit area description: *The Kaula, Kotselvaara-Kammikivi, Semiletka deposits are situated in the Pechenga District of the Murmansk Region near the township of Nickel forming a single ore field. All deposits are developed through underground mining by "Kaula-Kotselvaara" mine, open pit deposits has long been depleted. Mining operations were started: at Kaula in 1945, at Kotselvaara-Kammikivi in 1951, at Semiletka in 1966. The reserves of the Semiletka and Kotselvaara-Kammikivi deposits were approved in 1966.*

Ore output *depends on the level of demand and designed capacity of the mines. 2005 output: sulfide copper-nickel ore — 726.1 thousand t.*

Responsibilities of the Issuer: *Produce sulfide copper-nickel ores in accordance with the following basic conditions: develop the ore deposit according to the approved plan agreed with the State Environmental Expertise Committee and the State Expertise for Industrial Safety with annual mine capacity of 600 thousand tons of ore, prepare and approve the plan of liquidation (conservation) of the mining enterprise in the prescribed manner not later than 6 months prior to expected term of completing development of the ore deposit; carry out an advance geological survey of the natural resources; comply with applicable environmental standards and regulations, safety standards and regulations; protect tailing dumps, spoil banks, substandard ore storage and record basic useful components contained therein; provide for disturbed land rehabilitation; take measures prescribed by law and applicable regulatory documents in the field of industrial safety and labor protection, in the field of environmental and resources protection as well as for participating in socio-economic development of the Pechenega area and the Murmansk Region.*

Recurring payments. *Tax on mineral resources development at the rate of 8% of the price of multicomponent complex ore components without extraction of useful components including precious metals. No payments are charged for associated enclosing rock produced for own consumption.*

Licensed operations: *Sulfide copper-nickel ore mining at the Polar deposit to extract nickel, copper, cobalt, sulfur, gold, silver, platinoids.*

Grounds for issue: *decision of the Murmansk Region Administration and the Committee for Natural Resources of the Murmansk Region.*

Deposit area description: *The deposit is situated in close vicinity to the town of Zapolyarny in underlaying phyllites of the Zhdanovskoye deposit sheet. Discovered in 1966. Reserves were twice approved by the USSR State Reserves Committee — in 1974 and 1982. Developed since 1975 through underground mining by the "Severnoy" mine. The copper-nickel deposits of Zhdanovskoye, Zapolyarnoye, Tundrovoye, Bystrinskoye, Verkhnee and Sputnik are a part of the East ore knot of the Pechenga ore field and have a common underground mining mode (to the level of minus 920 m) within a common mine take including also open-cut mines of the Zhdanovskoye deposit. The last update of the deposit opening and mining project was approved on December 6, 2001.*

Ore output *depends on the level of demand and designed capacity of the mines. 2005 output: sulfide copper-nickel ore — 675.5 thousand t.*

Responsibilities of the Issuer: *to apply state-of-the art technology, comply with applicable environmental standards and regulations, safety standards and regulations; to protect tailing dumps, spoil banks, substandard ore storage and record basic useful components contained therein; to provide for disturbed land rehabilitation.*

Recurring payments. *Tax on mineral resources development at the rate of 8% of the price of multicomponent complex ore components without extraction of useful components including precious metals. No payments are charged for associated enclosing rock produced for own consumption.*

Licensed operations: *Sulfide copper-nickel ore mining at the Tundrovoye, Bystrinskoye, Verkhnee, Sputnik deposits to extract nickel, copper, cobalt, sulfur, gold, silver, platinoids.*

Grounds for issue: *decision of the Murmansk Region Administration and the Committee for Natural Resources of the Murmansk Region.*

Deposit area description: *The deposits of Tundrovoye, Bystrinskoye, Verkhnee, Sputnik, Zhdanovskoye and Zapolyarnoye are a part of the East ore knot of the Pechenga ore field consisting of several groups of superimposed ore bodies while the Tundrovoye and Bystrinskoye deposits are a direct extension (i.e. deep levels) of the Zhdanovskoye deposit. The Tundrovoye, Bystrinskoye, Verkhnee, Sputnik deposits have been subject to detailed exploration and approval of their in-place reserves. The project of deposit opening and mining to the level of -440 m was approved on September 24, 1993 and updated on December 6, 2001.*

Ore output *depends on the level of demand and designed capacity of the mines. 2005 output: sulfide copper-nickel ore — 626 thousand t.*

Responsibilities of the Issuer: *to apply state-of-the art technology, comply with applicable environmental standards and regulations, safety standards and regulations; to protect tailing dumps, spoil banks, substandard ore storage and record basic useful components contained therein; to provide for disturbed land rehabilitation.*

Licensed operations: *Additional geological survey and chromite ore mining at the Sopcheozerskoye ore deposit.*

Grounds for issue: *Decision No. 146-r/45 of December 9/20, 2000 on conversion of License No. MUR 00383 TE of the Murmansk Region Administration and the Committee for Natural Resources of the Murmansk Region.*

Deposit area description: *The Sopcheozerskoye ore deposit is situated 9 km to the south-west of the town of Monchegorsk, its total area being 5 sq km and depth limitation minus 500 m from the surface. The site should be considered excluding the Sopchyavr lakescape and the water protection area around the lake and along inflowing streams. The deposit was investigated in 1995-1996 at the explorations stage by magnetic and gravimetric prospecting, drilling of holes 70 to 490 m deep and laboratory testing of processing properties. During the period of 1997 to 2000 the deposit was subject to prospect evaluation survey which showed that the blanket ore body extended under morainic deposits 20 to 40 m thick. The deposit's total reserves and grades $C_1 + C_2 + P_1$ undiscovered potential resources were approved by the Regional Reserves Committee of the Committee for Natural Resources of the Murmansk Region (Minutes No. 42-2000 dated August 17, 2000). The deposit's reserves and resources may increase along the boundaries.*

Responsibilities of the Issuer:

- 1. Additional geological survey (evaluation and prospecting) shall be completed and obtained data shall be submitted for state appraisal by Quarter IV 2000. The survey has been completed. The deposit's total reserves and grades $C_1 + C_2 + P_1$ undiscovered potential resources were approved by the Regional Reserves Committee of the Committee for Natural Resources of the Murmansk Region (Minutes No. 42-2000 dated August 17, 2000).*
- 2. The report on calculated reserves shall be presented by Quarter IV 2002. Since the idea of the deposit's geological structure and area changed, the scope of exploration work and timing of work performance were increased.*
- 3. The starting date of commercial development and the period of reaching design capacity shall be specified in a supplementary license agreement subject to the results of state appraisal.*
- 4. Pilot mining of up to 50 thou t. The Department of Natural Resources of the Murmansk Region approved amendment of the license agreement as regards pilot mining of 150 thou t for the purpose of continued improvement of the opening scheme and performance of an additional technological study.*

Other responsibilities of the Issuer: *to perform mining operations in accordance with applicable environmental standards; to apply technology preventing pollution of the lake of Sopchyavr and the creek of Petlanditovy, to arrange the monitoring of adverse effects of geological survey and mining operations on environment; to provide for land rehabilitation upon mining completion.*

Ore output. *According to the bidding terms the Issuer shall annually increase the output of chromite ore by at least 200 thou t according to the duly approved mining project. The output and the period of reaching design capacity shall be specified in a supplementary license agreement. The supplementary license agreement established commencement of commercial deposit development not later than Quarter I 2005. The period of reaching design capacity of the mining company is Quarter I 2007. No ore is presently mined.*

Recurring payments: *Regular payments for mineral resources development at the rate specified for exploration and evaluation of mineral resources per area except discovered deposits. Regular payments for mineral resources development at the rate specified for exploration of mineral resources per area where mineral resources have been confirmed and recorded by the State Reserves Balance. If the period of geological survey is extended the payments increase 1.5 times.*

Licensed operations: *Titan-magnetite – ilmenite ore exploration and mining in the south-east part of the Gremyakha-Vyrmes Massif.*

Grounds for issue: *Joint Resolution of the Russian Ministry of Natural Resources (No. 17 of May 3, 2001) and the Murmansk Region Administration (No. 186 PP of May 25, 2001) "On Results of Bidding for Exploration and Development of titano-magnetite – ilmenite ore deposit at the South-East Part of the Gremyakha-Vyrmes Massif".*

Deposit area description. *The site is located in the Kolski District of the Murmansk Region, 30 km to the south-west of the township of Murmashi. Explored in 1994-1995 at the stage of exploration and evaluation by magnetic prospecting, drilling of holes 120 to 360 m deep and laboratory testing of the ore processing properties (11 small samples and 1 laboratory technological sample). The deposit consists of 6 steep ore bodies. Since August 2000 the site was explored under License No. MUR 00483 issued to OAO "Kola Mining and Metallurgical Company" and valid to March 31, 2003 which was cancelled on the date of issue of the license under review. The site has a mine take status, its area being 3 sq km and provisional depth limitation minus 500 m from the surface.*

Responsibilities of the Issuer:

1. *Geological exploration shall be completed by September 30, 2002, its results used to prepare a feasibility study and "provisional" conditions. If found feasible the project of geological exploration shall be developed by December 31, 2002. Executed.*

2. *Geological exploration shall include two stages. Stage 1 — exploratory drilling for future mining to the depth of 200 m, approval of C₁ (possibly B) grade reserves, preparation of the mine technical project, presentation of the report on reserve calculations by December 31, 2003. Stage 2 — additional exploration of the deposit area – 2004-2006; the scope of mining and drilling operations to be determined by a supplementary project. Since the idea of the deposit's geological structure and area changed, the scope of exploration work and timing of work performance were increased. The feasibility study of exploration conditions has been approved.*

Ore output. *The output and the period of reaching design capacity shall be specified in a supplementary license agreement. No ore mining is presently performed.*

Other responsibilities of the Issuer: *to perform mining operations in accordance with applicable environmental standards; to apply technology preventing pollution of surface and subsurface water; to arrange the monitoring of adverse effects of geological survey and mining operations on environment; to provide for land rehabilitation upon mining completion.*

Recurring payments *Regular payments for mineral resources development at the rate specified for exploration of mineral resources per area where mineral resources have been confirmed and recorded by the State Reserves Balance.*

In case of mining and product marketing 1% of revenue shall be allocated to the Association of Kola Lapps as agreed upon with the Kolski District Administration.

Licenses held by OAO "Taimyrgas"

Number: DUD 00093 NE

Date of issue: December 29, 1998

Valid to: January 1, 2020

Licensed operations: gas and gas condensate recovery from Lower Cretaceous deposits (Sukhodudinskaya suite) and geological exploration for the purpose of new resources development in Cretaceous and Jurassic deposits at the Pelyatkinskoye gas-condensate field.

Grounds for issue: resolution of the Administration of the Taimyr (Dolgano-Nenets) Autonomous District and the Committee for Natural Resources of the Taimyr Autonomous District on the conversion of License No. DUD 00040 NE "Gas and condensate recovery and additional prospecting at the Pelyatkinskoye gas-condensate field" based on paragraph 4, Article 10-1 and paragraph 3, Article 17-1 of Law of the Russian Federation No. 27-FZ "On Mineral Resources" of March 3, 1995.

Deposit site description: The licensed site is situated in the Ust-Yeniseiski District of the Taimyr (Dolgano-Nenets) Autonomous District 210 km to the west of Dudinka and has a mine claim status restricted by the bottom of Jurassic deposits. The site area is 28,875.56 ha.

Responsibilities: Pursuant to the license agreement the license holder shall construct the Pelyatkinskoye field – Severo-Soleninskoye field gas pipeline, the field exploitation rate being specified by the pilot development project subject to the demand of consumers within the Taimyr Autonomous District consumers and the areas under supervision of the Norilsk City Administration.

Recurring payments: statutory payments: gas — 147 Rubles per 1,000 cu m, condensate — 17.5%.

Licenses held by OAO "Norilskgasprom"

Number: DUD 00083 NE

Date of issue: September 25, 1999

Valid to: June 2018

Licensed operations: Hydrocarbon gas production, exploration of Lower Cretaceous and Jurassic deposits at the Messoyakhskoye gas field.

Grounds for issue: The right to exploit the sites was granted by executive committees of the Tyumen Region and the Taimyr Autonomous District.

Deposit site description: The site is situated at the township of Tukhard, Ust-Yeniseiski District of the Taimyr Autonomous District, Tazovski District of the Yamalo-Nenets Autonomous District.

The site with a mine claim status has an area of 23,982.3 ha.

Responsibilities: compliance with applicable standards and regulations for operating safety, field development control and environment protection; utilization of mineral resources solely for approved purposes; development of the field in accordance with the approved project and technical maintenance rules; application of the most efficient recovery methods to extract all useful components; prevention of above-standard losses of mineral resources, selective reservoir development, operation of nontight wells, gas crossflow between beds and gas escape to the surface; recording of the condition and changes of reserves and losses of mineral resources; development drilling and maintenance of geological, surveying and engineering documentation; prevention of any damage to the developed field and adjacent fields, protection of temporarily preserves mineral resources; providing for operations safety for employees and people, protection of the field from fire and other hazards deteriorating the quality of mineral resources and the field's commercial value or impeding development thereof; preparation and approval of emergency response plans; prevention of the construction within the mine take of buildings, structures and other facilities without consent of supervisory authorities; providing for conservation and abandonment of the field or a part thereof in case of development suspension or discontinuation upon approval by supervisory authorities; reclamation of the sites disturbed by the development of mineral resources as specified by applicable law; entry into land use agreements with land owners; obtaining licenses for utilization of water resources.

Performance of responsibilities:

Land lease agreements with district administrations were concluded. The license for utilization of water resources was obtained. The application for a water intake is being considered by the Tyumen basic authority.

Recurring payments: gas — 147 Rubles per 1,000 cu m, condensate — 17.5%.

Responsibilities: compliance with applicable standards and regulations for operating safety, field development control and environment protection; utilization of mineral resources solely for approved purposes; development of the field in accordance with the approved project and technical maintenance rules; application of the most efficient recovery methods to extract all useful components; prevention of above-standard losses of mineral resources, selective reservoir development, operation of nontight wells, gas crossflow between beds and gas escape to the surface; recording of the condition and changes of reserves and losses of mineral resources; development drilling and maintenance of geological, surveying and engineering documentation; prevention of any damage to the developed field and adjacent fields, protection of temporarily preserves mineral resources; providing for operations safety for employees and people, protection of the field from fire and other hazards deteriorating the quality of mineral resources and the field's commercial value or impeding development thereof; preparation and approval of emergency response plans; prevention of the construction within the mine take of buildings, structures and other facilities without consent of supervisory authorities; providing for conservation and abandonment of the field or a part thereof in case of development suspension or discontinuation upon approval by supervisory authorities; reclamation of the sites disturbed by the development of mineral resources as specified by applicable law; entry into land use agreements with land owners; obtaining licenses for utilization of water resources; presentation upon completion of exploration and prospecting of the calculations of hydrocarbon reserves in the Nizhnekhetskaya suite deposits and Jurassic deposits for proper appraisal.

Performance of responsibilities:

Land applications are being considered by the Department of Natural Resources Management and Oil-and-Gas Complex Development in Salekhard. The license for utilization of water resources was obtained. The application for a water intake is being considered by the Tyumen basin authority.

Recurring payments: gas — 147 Rubles per 1,000 cu m, condensate — 17.5%.

b) Processing of recovered mineral products

Polar Branch

The ore produced by the Polar Branch mines is concentrated by Talnakhszkaya and Norilsk Concentrating Mills. Talnakhszkaya mill processes high-grade ores of the Talnakhszkoy and Oktyabrskoye deposits producing nickel, copper and pyrrhotine concentrate. Norilsk Mill processes the total output of disseminated ore mined at the Taimyr deposits, a part of high-grade cupreous ore of the Talnakhszkoye and Oktyabrskoye deposits and old pyrrhotine concentrate to manufacture nickel and copper concentrates.

The Polar Blanch operates three metallurgical plants: Nadezhdinski, Nikelevy and Medny.

Nadezhdinski Metallurgical Plant processes nickel and pyrrhotine concentrate produced by Talnakhszkaya Concentrating Mill, about 15% of concentrate produced by Norilsk Concentrating Mill and copper concentrate produced by the Converter Matte Separation Shop of the nickel plant to manufacture converter matte, copper anodes and elementary sulfur.

Nikelevy Plant processes about 85% of nickel concentrate produced by Norilsk Concentrating Mill, the total output of old pyrrhotine concentrate and a part of converter matte produced by Nadezhdinski Metallurgical Plant to manufacture commercial nickel and cobalt.

Medny Plant processes copper concentrate produced by Norilsk and Talnakhszkaya Concentrating Mills and copper anodes of Nadezhdinski Metallurgical Plant to manufacture commercial copper, elementary sulfur and sulfuric acid. The metallurgical shop of the copper plant producing precious metal concentrates processes slime

produced by the Copper Electrolysis Shop and the Nickel Electrolysis Shop to manufacture precious metal concentrates, metallic silver, selenium and tellurium.

The Polar Branch refines precious metals at Krasnoyarsk non-ferrous plant under tolling contracts. The Company outsources a subcontractor for partial processing of mineral products (separation of gravitational concentrate during ore concentration).

The price of outsourced mineral product processing over the period under review amounted to USD 694.3 thousand less VAT.

Kola GMK

The concentrating mill of "Pechenganickel" Works operated by Kola GMK processes ore produced by the Kola Peninsula mines to manufacture collective copper-nickel concentrate supplied for roasting. Obtained pellets are processed by the smelter shop to manufacture converter matte delivered for further processing to "Severonickel" Works. "Severonickel" Works process converter matte received from the Polar Branch of MMC Norilsk Nickel and "Pechenganickel" Works as well as purchased copper scrap. The principal products produced by the works are electrolytic nickel and copper, carbonyl nickel, precious metal concentrates, cobalt concentrate and sulfuric acid.

Precious metals produced by Kola GMK are refined by Krasnoyarsk non-ferrous plant under tolling contracts.

OAO "Norilskgasprom"

In Quarter I 2006 no gas condensate processing was carried out.

OAO "Taimyrgas"

In Quarter I 2006 OAO "Taimyrgas" did not perform any processing operations.

c) Product marketing

OJSC MMC Norilsk Nickel holds licenses required for export of precious metals and individual types of carbonyl nickel powder. PMs are marketed in accordance with Decree No. 51-4 of the Russian Government dated January 24, 2002.

License No. 4000717 issued by the Russian Ministry of Energy on November 29, 2002 authorizes OAO "Taimyrgas" to sell oil, gas and relating products under Resolution No. 425 of the Russian Ministry of Energy dated November 29, 2002. The license is valid to November 28, 2007.

3.2.10. Additional requirements to issuers basically engaged in providing communication services

To be left blank.

3.3. The Issuer Prospects

The development strategy of OJSC MMC Norilsk Nickel is based on the following four principles:

- change of production growth according to the market demand;
- production efficiency improvement;
- solution of environmental problems;
- maintaining steady and efficient operations of the Company.

In 2006 the Company focuses on maintaining the ore output, upgrading and reconstruction of production facilities and further reduction of unit costs.

The business priorities of MMC Norilsk Nickel for 2006 and following years are: construction and commissioning of raw-materials base facilities providing for timely replenishment of retired capacities and preservation of existing value of mined ores; upgrading and reequipment of the production facilities associated with ore concentration process and metallurgical process stages; implementation of automated systems to control

technological processes; take environmental measures aimed at reduction of emissions and improvement of environmental conditions.

In 2006 capital works in respect to the principal ore base facilities of the Polar Branch are under way.

At the Oktyabrsky mine there are works under way as related to reconstruction of existing capacities of level – 650 m for developing solid sulfide ores of the western wing of the X-1(0) deposit (completion of the project – 2014), in 2006 it is planned to commission the 1st startup complex with a capacity of 1,100 thousand t per year of high-grade ore, and activities for reconstruction of the facilities used to develop, prepare and process cupreous ores (completion of the project – 2007).

At the Taimyrsky mine there are works under way as related to reconstruction of existing capacities and development of new levels – 1,100 m, -1,300 m (portions of the C-2 deposit), -1,400 m of the X-1(0) deposit and replenishment of retired facilities used to develop copper-nickel ore deposits. The 2006 target task is to commission the second stage of the 1st startup complex with a capacity of 500 thou t/year of the C-2 deposit reserves (level – 1,300 m).

By 2009 it is planned to complete operations for upgrading of the Komsomolsky mine skip winding equipment.

The basic activities scheduled for 2006 include further increase of ore output at the Severny-Gluboky mine (Kola Peninsula) with a view to ensuring commissioning of the 2nd startup complex facilities by 2007 and increase in ore production capacity up to 6.0 mln tons per year. There are works at the Severny mine (Kola Peninsula) under way aimed at development and processing of remaining ore reserves of the Zapolyarnoye deposit the purpose of which is to create optimal conditions for loading the Pechenganickel concentrating mill with crude ores by 2013.

In 2006 the Polar Branch of the Company continues construction operations for reconstructing the Lebyazhye tailing dump, which will allow to provide the concentrating mills of the Polar Branch with necessary facilities to store rock tails taking into account future increase of ore output and processing. Completion of the project – 2007.

In 2006 the Kola GMK (Kola Peninsula) finishes operations for reconstructing the OF-1 pump station aimed at improving reliability of the production scheme and environmental protection against refuse ore pollutions.

In 2006 it is scheduled in the Polar Branch to finish operations for reconstructing the PV-3 automatic and energy supply system at the Medny works, which will allow to stabilize the technological process, improve the quality of melting and reduce nonorganic emissions. It is scheduled to commission new air separation plants at OP-1 and OP-2 (Medny works) by 2007 with a view to replenishment of retired capacities of the oxygen plants (OP-1 and OP-2).

An integrated energy company was created on the Taimyr Peninsula in 2005 with a view to supplying the Norilsk Industrial Area (NIA) with electricity and thermal energy.

The basic activities in 2007-2008 stipulated by the Concept of NIA energy complex development are aimed at increasing the capacity of the Ust-Khantaiskaya – Norilsk hydropower plant from 600 MW to 700 MW.

Activities for construction of the Pelyatkinsky gas condensate field on the Taimyr Peninsula were continued. The pilot operation of the Pelyatkinsky gas condensate field which was started in 2003 will last up to 2008 when commercial operation will be commenced. Operation of the field will allow to meet the requirement for gas supplies for the NIA enterprises during the next 50 years.

Within the frameworks of the Concept for creating an optimal transport system of the Company, activities started in 2004 are under way which are aimed at ensuring transport security as related to shipment of goods through the Northern Sea Route.

One of the most important objectives pursued by the Company is to reduce hazardous emissions and improve the ecological situation on the Taimyr and Kola peninsulas. In particular, the 2015 Production Development Strategy approved by the Board of Directors provides for a complex of measures aimed at solution of ecological problems.

Based on the estimates made by MMC Norilsk Nickel, these measures will lead to reduction of sulfur-dioxide emissions on the Taimyr Peninsula by 78% by 2015.

To reduce hazardous emission and considerably improve the ecological situation in Kola GMK (Kola Peninsula) MMC Norilsk Nickel together with the Government of Norway implements a project of "Pechenganickel" metallurgical plant renovation expected to enable the reduction of pollutant emission by more than 90%.

3.4. Participation of the Issuer in Industrial, Banking and Financial Groups, Holdings, Concerns and Associations

International Platinum Association e.V.

The International Platinum Association e.V. (hereinafter referred to as the International Platinum Association or the Association) was registered in 1988 in Frankfurt am Main (FRG) as a non-profit non-governmental organization. The Association unites major players of the world market of platinum metals and relating products.

Before 1999 Russia was represented in the International Platinum Association only by GUPVO "Almazyuvelirexport". In 1998 the session of the International Platinum Association was first held in St. Petersburg, Russia. The Association's management offered that OAO "RAO "Norilsk Nickel" join the Association. The offer was accepted and OAO "RAO "Norilsk Nickel" became a member of the Association in 1999.

In the course of restructuring of OAO "RAO "Norilsk Nickel" as capitalization centre was replaced by OJSC MMC Norilsk Nickel which became a member of the Association instead of OAO "RAO "Norilsk Nickel".

A major objective of the International Platinum Association is to form a forum of the leading world producers and processors of platinum metals to expand utilization thereof.

To this end the International Platinum Association implements programs of platinum metals promotion on global market and coordinates activities of a number of organizations for the benefit of its members. For instance, the International Platinum Association collaborates with the International Platinum Guild, a non-profit organization promoting platinum jewelry.

Of special interest is the experience gained by the members of the International Platinum Association in prevention of crime in this sphere, analysis of the effect of platinum metals and compounds on production personnel's health.

The membership in the International Platinum Association is also expected to be used for the promotion of platinum metals including palladium and offering new solutions for this metal utilization.

The Issuer's membership in the International Platinum Association is perpetual.

Euro-Asian Transport Union

The Euro-Asian Transport Union (hereinafter referred to as the Transport Union or the EATU) was registered in 2001 in Moscow as a non-profit organization. The Transport Union comprises major carriers.

According to the concept of development of international transportation corridors the Russian Ministry of Transport pursues a policy of cooperation with all market players. Participants of the International Euro-Asian Conferences on Transport conducted in St. Petersburg in 1998 and 2000 held a lively discussion of different aspects of cooperation and motivation of private investor involvement in the implementation of the government's transit policy.

As the realization of transit potential is a long-term priority of the government, an element of the economic program and geopolitical doctrine of the Russian Federation to implement the Declarations adopted by the above Conferences a number of Russian companies resolved to combine their efforts within the framework of a non-profit organization — the Euro-Asian Transport Union.

The EATU's major objective is to coordinate cooperation of Russian and foreign business with government authorities and international organizations, to create a common space of interaction among carriers, insurers, freight owners and financial institutions in logistics and investment operations. The EATU was formed to:

- coordinate national and international activities of government authorities and private carriers for the implementation of decisions and recommendations of the International Euro-Asian Conferences on Transport;
- assist the Ministry of Transport of the Russian Federation and the Ministry of Railways of the Russian Federation in the development of transport infrastructure and laying out international transportation corridors within the Russian Federation;
- involve international and national organizations in the implementation of investment projects presented to the Conferences, adapt the projects to investor requirements, render advise in project financing;
- arrange conferences and symposia in Russian regions involved in the Euro-Asian transportation;
- hold training seminars and refresher courses for transport personnel.

The Ministry of Transport of the Russian Federation welcomes private initiatives in the transport sector and strongly supports the resolution to form the Euro-Asian Transport Union.

The Issuer's membership in the Euro-Asian Transport Union is perpetual.

Nickel Institute

The Nickel Institute was incorporated on March 1, 2004 through amalgamation of two entities — the Nickel Development Institute (NIDI) and the Nickel Producers Environmental Research Association (NiPERA).

The Nickel Institute may be joined by any nickel producer.

At present its full-fledged members are all leading nickel producers such as BHP Billiton, Codemin/Anglo Base Metals, Empress Nickel, Eramet, Falconbridge, Inco Limited, Inco TNC, Nippon Yakin Kogyo, OM Group, P.T. International Nickel, Sherritt International, Sumitomo Metal Mining, Umicore, WMC Resources accounting for 70% of the world nickel output.

The Institute provides its members with results of the latest research and lends them scientific and technical support. The NiPERA remains an independent unit within the Institute furnishing expert opinion on environmental matters and the effect of nickel on human health. The NiPERA continuously promotes nickel and assumes social responsibility for safe utilization of nickel and nickel-containing materials. The Nickel Institute stands an important and established forum for the promotion of Russian nickel on international market.

The Nickel Institute focuses its attention on rapidly developing consumers of stainless steel (transport, power engineering, telecommunications, etc.) for the purpose of maintaining steady production and consumption of primary and secondary metal.

The Issuer's membership in the Nickel Institute is perpetual.

Cobalt Development Institute

The London-based Cobalt Development Institute (CDI) was established in 1957 as a non-profit non-governmental organization and has been operating in its present form since 1982. Currently the CDI has 60 members from 18 countries including all leading cobalt producers and a number of major consumers.

The Institute's principal objective is to develop a package of measures aimed at the improvement of market performance and promotion of cobalt utilization. The Institute monitors research and development of new cobalt production processes and/or new applications. The Company may greatly benefit from the cobalt safety research performed by the Institute given law tightening in industrially advanced economies consuming cobalt (in the first place the EC).

The Issuer's membership in the Institute is perpetual.

IV. Financial and Business Operations of the Issuer

4.1. Financial and Business Results of the Issuer

4.1.1. Profit and loss

Indicators showing the Issuer's profits and losses:

No.	Indicator	2001	2002	2003	2004	2005	Quarter I 2006
1	Receipts, RUB 000'	97,344,150	88,342,100	135,326,905	163,376,131	171,137,508	43,711,666

3	Net profit (undistributed profit (uncovered loss)), RUB 000'	31,418,616	3,701,335	36,483,882	51,143,620	58,159,465	(22,634,411)
4	Return on equity, %	20.17	2.40	20.60	23.30	25.67	(12.78)
5	Return on assets, %	14.75	1.67	14.19	16.11	17.28	(8.14)
6	Net profit ratio, %	32.28	4.19	26.96	31.30	33.98	(51.78)
7	Products (sales) profitability, %	51.69	38.43	46.51	49.93	57.06	63.31
8	Turnover of capital, %	62.48	49.68	67.27	68.86	69.75	22.37
9	Amount of uncovered loss as of the reporting date, RUB 000'	-	-	-	-	-	-
10	Ratio of uncovered loss as of the reporting date and balance-sheet total, %	-	-	-	-	-	-

The net profit for 2005 increased by 17% as compared to 2004. The profit margin was basically influenced by the following major factors:

- *Increase of receipts from sales of metals while there was a general trend for reduction of cost of products sold, and*
- *Losses on operating activity due to sales of securities owned by the Issuer.*

In this connection, the net profit ratio of the Company increased by 8% in 2005 regardless of losses on sales of securities.

The values of all profitability indicators and the ratio of capital turnover show a steady trend for growth during the last 3 years.

In Quarter I 2006 the Company's operating result is a loss amounting to (-22,634,411 thousand rubles). Reduction of net profit in comparison with the similar figures of Quarter IV 2005 was caused by recognizing of operating expenses in Quarter I 2006 as expenses associated with redemption of own shares acquired and bought out from the shareholders (see also para. 2.1). The figures of profitability of the capital and shares also have negative values for the period under review. At the same time, the sales profitability ratio continues to show a positive trend and achieves the value of 63.31 as compared to 57.06 in 2005.

The Articles of Association and the internal documents of OJSC MMC Norilsk Nickel do not provide for approval of the Issuer's Quarterly Report by the Board of Directors or the Management Board of the Company.

4.1.2. Factors affecting sales revenue and operating profit

The basic factors affecting change in the amount of receipts from sales of products (works, services) of OJSC MMC Norilsk Nickel are sales volumes, selling prices and fluctuations of the ruble exchange rates to US dollar.

The degree of influence of the above mentioned factors on the amount of receipts for the period from 2001 to 2005 and Quarter I 2006 is shown in the following table:

Indicator	2001	2002	2003	2004	2005	Quarter I 2006
Sales volumes	-48.2	-66.4	+24.4	-53.0	+5.8	-148.3
Selling prices	-66.9	+158.0	+83.2	+192.9	119.0	+56.7
Ruble and US dollar exchange rate	+15.1	+8.4	-7.6	-39.9	-24.8	-8.4

*) % to the previous period

The Articles of Association and the internal documents of OJSC MMC Norilsk Nickel do not provide for approval of the Issuer's Quarterly Report by the Board of Directors or the Management Board of the Company.

4.2. Liquidity

Indicators characterizing the Issuer's liquidity:

No.	Indicator	As of 31.12.2001	As of 31.12.2002	As of 31.12.2003	As of 31.12.2004	As of 31.12.2005	As of 31.03.2006
1	Working capital, RUB 000'	40,051,159	23,133,101	25,662,737	14,603,606	(10,577,977)	(2,516,922)
2	Permanent asset index	0.74	0.85	0.86	0.93	1.05	1.01
3	Working capital ratio	1.70	2.07	1.89	1.40	1.09	1.19
4	Quick liquidity ratio	0.59	0.64	0.96	0.80	0.59	0.64
5	Capital autonomy ratio	0.73	0.70	0.69	0.69	0.67	0.64

The amount of the Company's working capital reduced to the level of (-10,577,977) thousand rubles in 2005. The main factor which caused reduction of the working capital as compared to the level of 2004 is accounted for by increase of long-term financial investments.

The same factor (increase of long-term financial investments) also influenced other indicators characterizing the Company liquidity, - permanent asset index, working capital and quick liquidity ratios (due to utilization of monetary funds during investment).

However, in general the figures given in the table show a quite high level of the Company liquidity although there is a slight negative trend in the last reporting period.

In Quarter I 2006 the level of liquidity is generally consistent with the level of 2005.

The Articles of Association and the internal documents of OJSC MMC Norilsk Nickel do not provide for approval of the Issuer's Quarterly Report by the Board of Directors or the Management Board of the Company.

4.3. Size and Composition of the Issuer's Capital and Current Assets

* The value of acquired own shares is given based on decision of the Board of Directors dated December 2, 2004 and amount of redeemed own shares by virtue of decision on restructuring adopted by the Extraordinary General Meeting of September 30, 2005.

The amount of the authorized capital given in this section is consistent with the constituent documents of OJSC MMC Norilsk Nickel.

The total value of the Company's capital as of December 31, 2005 amounts to 221.9 bln rubles, the change for 2005 + 2.9 bln rubles (or 1.3%) was caused by the following factors:

- *growth of the amount of undistributed profits;*
- *redemption of own shares from the shareholders, which resulted in reduction of the Company's capital.*

The share of undistributed profit in the capital was 96% in 2005.

As of March 31, 2006, the Company's total capital value amounts to 171.9 bln rubles. The main factors which materially affected the capital reduction are as follows (see also para. 2.1):

- 1) transfer of a portion of OJSC MMC Norilsk Nickel's property to OAO Polyus Zoloto according to the separation balance-sheet;*
- 2) losses associated with recognition of redemption of own shares acquired and redeemed from the shareholders.*

Size and composition of current assets:

No.	Indicator	As of 31.12.2005		As of 31.03.2006	
		Amount	Structure, %	Amount	Structure, %
1	Stocks, RUB 000'	39,739,789	39.85	39,515,797	40.17

7	Total current assets, RUB 000'	99,724,941	100.00	98,366,744	100.00

As of the end of 2005, the specific weight of marketable current assets (subpara. 4-5) is 17.6%. As compared to 2004, this indicator reduced by 10%, essentially, due to reduction of the cash balance.

As of March 31, 2006, the share of marketable assets in the current assets of the Company is 13.8%.

The Company policies as related to financing of current assets consists in the following:

- 1. Financing of operating activity on account of own funds.*
- 2. Utilization of reasonable borrowed funds for strategic investments.*

The information on intangible assets has been given in accordance with the Russian Accounting Standards "Intangible Assets Accounting" approved by Order of the Ministry of Finance of Russia dated 16.10.2000 No.91n.

4.4. The Issuer's Policy and Investments in Scientific and Technological Development, Licenses, Patents, New Research and Developments

The Company management approved the Concept of Production and Technology Development for the Period to 2010 (Minutes of the Management Board No. GMK/50-pr-p of December 19, 2002 and Minutes of the Board of Directors No. GMK/5-pr-sd of March 18, 2003) (hereinafter – the Company Development Concept).

The Issuer's research and development activity is intended to support the Company Development Concept implementation by the results of research and development, feasibility studies, design and exploration.

With a view to improving efficiency of management of the results of research and development and creating the background for transition to a new qualitative level of management of the Company technological development, activities have been continued as to master the reporting system using a certificate of comprehensive assessment of the results of research and development. Activities have been initiated as to creation of the "Corporate Standard of OJSC MMC Norilsk Nickel for professional competence of employees involved in implementing innovative projects" and a set of training and methodical materials on the subject "Principles of innovative technological activity".

The Company's Head Office has finished developing and implementing the Integrated Quality Management and Environmental Control System in accordance with the requirements of international standards ISO 9001:2000 and 14001:2004. Based on the results of certification audit conducted by one of the leading international certification authorities, BVQI, in December a certificate of conformance was issued to OJSC MMC Norilsk Nickel in the field of "Management of production and projects, sales and deliveries of products (nickel, copper, cobalt, precious metals, sulphur, selenium, tellurium)". In 2005 the quality management system in accordance with the requirements of ISO 9001:2000 in the certification domain "Production of nickel, copper and cobalt" was also implemented and successfully certified in the Company's affiliates.

In cooperation with executive authorities and the Metallurgy Committee of the Chamber of Commerce and Industry of Russia, the Company participated in the development of a technical supervision and regulation system for the Russian mining industry. The Company performs a review of the Company's technical standards and their harmonization with requirements of the Federal Law "On Technical Regulation". Within a working group the Company's specialists take part in development of the special technical regulation: "On safety of processes of extraction, concentration and processing of mineral resources" and the general technical regulation: "On environmental safety". During Quarter I, 10 draft special technical regulations were appraised which are developed according to the "Program..." approved by Resolution of the Government of the Russian Federation.

Information on the number of obtained patents for inventions relating to improvement of the Company technological processes will be given in subsequent reports of 2006.

In Quarter I 2006 total R&D expenses amounted to 17.06 mln Rubles.

There is no risk of expiry of trademark licenses.

4.5. Trend Analysis of the Issuer Core Operations

The main factor which considerably influences the Company performance is prices for non-ferrous and precious metals in the world market.

During the last four years, there has been the longest for the last 50 years period of metal price boost, and the 2004-2005 period showed a steady growth of prices. The basic reasons for a steady growth of metal prices are as follows:

- Stable worldwide demand;*
- Cost escalation during metal production.*

Most regions show a trend for increase in growth rates of commercial production. Judging by the basic figures of commercial production, analysts predict persistence of increased activity for a few next months. For the most part, acceleration of the worldwide demand is supported by the growth of economies in Asia and, especially, in China.

Cost escalation during metal production conditioned by such factors as growth of prices for energy, reduction of metal content in ore, increase of capital expenses in the mining industry, also contributes to persistence of a high level of the world prices for metals.

The second important factor affecting the proceeds is dollar-ruble exchange rate.

In the period of 2000-2003 there was a tendency for increase in the rate of dollar, which positively influenced the amount of proceeds. The highest rates of dollar were in 2002 +7.6%.

Beginning from 2003, there has been a gradual decline of the dollar rate as compared to the previous period: -2.5% in 2003, -6.0% in 2004. The actual ruble-dollar exchange rate in 2005 was 28.31 RUB/\$, which is lower than the level of 2004 by 50 kopecks (-1.74%). This negative trend also persisted in Quarter I 2006 (-1%). At present time, there are opportunities for ruble to continue to strengthen.

In addition, the Company's operations are still considerably affected by:

- market risks;*
- national currency rate;*
- amendment of labour safety and environment protection law;*
- manufacturing risk arising from severe weather conditions of the Far North.*

The risks described above may materially affect the Company's operations, sales, revenue, assets, liquidity and capital resources.

Major competitors of OJSC MMC Norilsk Nickel are:

on nickel market — INCO (Canada), Falconbridge (Canada), Jinchuan (China);

on copper market — Codelco (Chile), Phelps Dodge (USA), Grupo Mexico (Mexico), Urals Mining and Metallurgical Company (Russia);

on PMs market — Anglo Platinum (South Africa), Impala (South Africa), Lonmin (South Africa).

Factors of the Company's competitiveness:

In logistics:

- availability of sources of raw materials with high content of basic elements;*
- availability of cheap power sources.*

In production:

- employment of highly efficient production processes;*
- operation of state-of-the-art equipment;*
- availability of a specialized branch research institute;*
- high-skilled personnel.*

In marketing:

- low production costs (by virtue of the above factors);*
- efficient logistical product delivery system;*
- full-scale distribution network and end user orientation;*
- products' compliance with international standards.*

The Articles of Association and by-laws of OJSC MMC Norilsk Nickel do not provide for the approval of the Issuer's quarterly accounts by the Board of Directors or the Management Board.

Resolution of the State Customs Committee of the Russian Federation "On Export Duty Rates" No. 865 of August 6, 2003.

8.8. Tax Assessment of the Issuer's Regular Securities Issue Proceeds

Tax on regular securities issue proceeds is assessed as specified by applicable tax regulations of the Russian Federation (Tax Code of the Russian Federation, Chapter 23 "Personal Income Tax" and Chapter 25 "Corporation Income Tax").

1. Tax on securities transactions

1.1. Tax on personal income from transactions in the Issuer's securities

The procedure of tax assessment of personal income from securities transactions is specified in Chapter 23 of Russian Tax Code (Chapters 214-1,220,224).

Income (loss) from securities transactions shall be determined for all transactions in securities of a particular class executed during the tax period under review less losses.

Income (loss) from securities transactions shall be determined as the difference between total proceeds from securities sale and documented cost of securities acquisition, sale and holding actually incurred by taxpayers or material deductions intended to reduce proceeds of securities transactions.

If the taxpayer cannot produce a documentary evidence of its expenses it may take the advantage of material deduction as provided for the Tax Code of the Russian Federation.

The taxpayer shall be entitled to material deduction of the full amount of proceeds received from transaction in securities held for a period of three or more years; in case the taxpayer held securities for less than 3 years such material deduction shall not exceed 125 thousand Rubles.

The taxpayer may take the advantage of material tax deduction or deduction of documented incurred expenses if the tax is calculated and withheld by the income source (broker, trustee, management company holding in trust the assets constituting a unit investment fund or other party executing transactions for the benefit of the taxpayer under a contract of agency or other similar contract) or upon expiry of the tax period at the time of filing tax return with tax authorities.

If income is paid by several sources material deduction may only be made by one source at the taxpayer's option.

Individuals who are not tax residents of the Russian Federation shall not be entitled to material deductions.

The tax on income of individual tax residents of the Russian Federation shall be assessed at the rate of 13 per cent.

The tax on income of individual tax non-residents of the Russian Federation shall be assessed at the rate of 30 per cent.

The tax base for securities transactions shall be defined as proceeds from securities transactions over the tax period under review.

The tax agent shall assess and pay tax upon expiry of the tax period or at the time of cash disbursement to the taxpayer before expiry of the tax period.

If the assessed tax cannot be withheld from the taxpayer by the income source the tax agent (broker, trustee or other party executing transactions for the benefit of the taxpayer under a contract of agency or other similar contract) shall within one month notify in writing local tax authorities of the impossibility of withholding and the sum due from the taxpayer.

In that case if an individual executed securities transactions unassisted by parties deemed to be tax agents (broker, trustee or other party executing transactions for the benefit of the taxpayer under a contract of agency or other similar contract) such individual shall assess and pay tax and file tax return.

1.2. Tax on legal entities' income from transactions in the Issuer's securities

The procedure of determining the tax base for securities transactions is specified in Chapter 25 of the Russian Tax Code (Article 280, Articles 309, 310, 329). The Tax Code specifies a special accounting procedure of profit and loss relating to securities transactions.

The taxpayer's proceeds from sale or other disposal of securities (including redemption thereof) shall be calculated based on the selling or disposal price and accrued interest income (coupon yield) paid by the purchaser to the taxpayer and accrued interest income (coupon yield) paid by the issuer (promisor) to the taxpayer. The assessment of tax on the taxpayer's proceeds from securities sale or other disposal shall not include interest income (coupon yield) earlier included in tax assessment.

The cost of securities sale (or other disposal) including units in unit investment funds shall be determined based on the acquisition price (including acquisition costs), cost of sale, any discounts from the estimated unit value, accrued interest income (coupon yield) paid by the taxpayer to the seller of securities. Such costs shall not include interest income (coupon yield) earlier included in tax assessment.

The market price of securities traded on organized securities market shall mean the actual price of securities sale or other disposal if such price falls within the interval between the maximum and minimum prices (price interval) of transactions in such securities recorded by the market maker on securities market on the date of the relevant transaction. If on that date the same securities were traded on securities market by two or more market makers the taxpayer may select the market maker whose price interval shall be used for tax purposes.

If the taxpayer sold securities traded on organized securities market and the transaction price is within the price interval recorded by the market maker such price shall be deemed market price for tax purposes.

If securities traded on organized securities market are sold at a price lower than the recorded minimum price the minimum price of transactions on organized securities market shall be assumed.

Profit (loss) from transactions in securities traded and not traded on organized securities market shall be accounted separately for tax purposes.

Russian business entities and foreign business entities acting through permanent establishments within the Russian Federation shall pay tax at the rate of 24 per cent as provided for by applicable law of the Russian Federation.

Foreign entities not engaged in business in the Russian Federation shall pay tax at the income source; in particular such tax shall be paid on stock sales proceeds by Russian entities holding assets in the Russian Federation more than 50 per cent of which consist of immovable property and other similar proceeds. Proceeds from sale of securities or relating derivatives on foreign stock exchanges shall not be deemed income received from sources within the Russian Federation.

Tax base of foreign entities trading in shares of Russian business entities holding assets in the Russian Federation more than 50 per cent of which consist of immovable property may be reduced by the sum of documented expenses as provided for by applicable law of the Russian Federation. In that case the difference between the foreign entity's sales proceeds and expenses shall be taxed at the rate of 24 per cent.

In other instances tax on such income of foreign business entities shall be assessed at the rate of 20 per cent.

1.3. If international treaties of the Russian Federation containing provisions relating to taxation specify other tax regulations than provided for by applicable Russian law provisions of such international treaties shall apply.

2. Tax on dividends

2.1. Tax on dividends received by individuals

Tax on income received by individuals in the form of dividends on the Company shares is assessed according to Part Two of the Tax Code of the Russian Federation (Chapter 23).

Dividends received by individual tax residents of the Russian Federation shall be taxed at the rate of 9 per cent.

Dividends received by individual tax non-residents of the Russian Federation shall be taxed at the rate of 30 per cent.

Business entities from which the taxpayer receives income (tax agents) shall assess, deduct and pay tax.

If the assessed tax cannot be withheld from the taxpayer the tax agent shall within one month notify in writing local tax authorities of the impossibility of withholding and the sum due from the taxpayer.

Tax agents shall pay assessed and withheld tax by the date of actual money receipt from the bank and the date of income transfer from tax agents' bank accounts to the taxpayer's account or third party bank accounts on the taxpayer's instruction.

Tax agent shall otherwise pay assessed and withheld tax on the day following the date of actual income receipt by the taxpayer.

2.2. Tax on dividends received by legal entities

Tax on income received by legal entities in the form of dividends on the Company shares is assessed according to Part Two of the Tax Code of the Russian Federation (Chapter 25).

Dividends received by legal entity tax residents of the Russian Federation shall be taxed at the rate of 9 per cent.

Dividends received by legal entity tax non-residents of the Russian Federation shall be taxed at the rate of 15 per cent.

The source of income (tax agent) shall deduct and pay tax within 10 days of income payment.

If dividends are paid to a foreign legal entity and/or individual who is no tax resident of the Russian Federation the taxpayer's tax base for each payment of dividends shall be equal to received dividends and subject to taxation.

2.3. Total tax shall be calculated by multiplying the applicable tax rate and the difference between dividends to be distributed among shareholders during the tax period under review reduced by dividends payable by the tax agent to foreign legal entity and individual tax non-residents during the tax period under review and dividends received by the tax agent during the tax period under review and the previous tax period unless such dividends were included in dividend tax assessment.

Tax agents shall assess tax to be withheld from the taxpayer's income based on total tax and the share of each taxpayer in total dividends.

2.4. If international treaties of the Russian Federation containing provisions relating to taxation specify other tax regulations than provided for by applicable Russian law provisions of such international treaties shall apply.
