Introduction

Basis for the Issuer's liability to disclose information in the form of Quarterly Report:

Disclosure of information in the form of Quarterly Reports is the liability of Open Joint Stock Company 'Uralsvyazinform' (further referred to as 'the Issuer', 'the Company') arising from sub-items б), в) item 5.1. of the Regulations of the RF Federal Financial Markets Service (FFMS) on disclosure of information by the issuers of issue securities, approved by FFMS Order dd. October 10, 2006№06-117/пз-н (as amended as of December 14, 2006), provided that:

– the Issuer performed registration of Securities Prospectuses with respect to the securities outstanding;

– the Issuer is a joint-stock company, created under privatization of a state-owned enterprise, pursuant to the Privatization Plan, so long as this plan was appropriately approved and on the date of its approval was regarded as Prospectus of the Issuer's shares, and the mentioned Privatization Plan allowed for alienation of the Issuer's shares to more than 500 owners.

This quarterly report contains estimates and forecasts of the authorized governing bodies of the Issuer regarding future events and/or activities, development prospects within the industry the Issuer operates in, and results of the Issuer's business activity, Issuer's prospects, probability of occurrences of certain events and undertaking certain actions. Investors are advised to not fully rely on the estimates and forecasts made by the Issuer's governing bodies, as actual results of the Issuer's activities in the future may differ from the forecasts due to the plenty of reasons. Purchase of the Issuer's securities carries inherent risks outlined in this quarterly report.

Analysis of paying capacity and financial status of the Issuer based on the economic analysis of performance of the given factors:

Company's Net asset value tends to stable growth. For the period from the 3rd quarter 2006 to the 3rd quarter 2007 the increase in net asset value made up 12.1 per cent and was caused by the growth of retained profit for the past years and the reporting year.

The decrease of Debt/Equity ratio comes from reduction of capital investment, enhancement of efficiency of current assets management; the increase in Short-term debt/Equity ratio relates to the growth of short-term accounts payable under credits and loan facilities.

Coverage of debt charges increased due to the growth of Net profit and the decrease of the value of liabilities redeemed within the reporting period.

The increase in Receivables turnover resulted from the growth of sales revenues by 12%.

Growth of Labor capacity was caused by the increase in sales revenues at the simultaneous staff redundancy.

Analysis of above-mentioned factors allows for deduction on sufficiency of the Issuer's paying capacity for discharge of its liabilities.

OJSC 'Uralsvyazinform' prevents from defaults on payments, and discharges all liabilities under agreements concluded within the stated timeframes. Due to the explicit investment policy of the Company in the previous years, one may now observe reasonable and well-balanced proportion of long-term and short-term liabilities of the Company.

2.2. Market capitalization of the Issuer

Procedure of calculation of the Issuer's market capitalization: **market capitalization is calculated by multiplying the quantity of shares of a certain category (type) by market price of one share, which is calculated by trade institutor in accordance with the Procedure of calculation of market prices of issue securities and trust funds shares, admitted to trading through the trade institutor, approved by the Decree of the Federal Commission for the Securities Market dd. December 24, 2003, №03-52/nc (registered by the Ministry of Justice of the Russian Federation as of January 23, 2004, registration**

number 5480).

2.3.3. Obligations of the Issuer appearing from the security provided to the third parties

Overall amount of the Issuer's obligations appearing from the security provided to the third parties as of the end of the reporting period: **RUR 11,449,015.53 thousand.**

Overall amount of obligations of the third parties, on which the Issuer granted security to the third parties, as of the end of the reporting period: **RUR 2,524,179.4 thousand,** among them:

- pledge: **no;**
- guarantee: **RUR 2,524,179.4 thousand.**

Issuer's obligations appearing from the security provided to the third parties within the period from the beginning of the present fiscal year up to the end of the reporting quarter, including securities provided in the form of the pledge or the guarantee, amounting at least 5 per cent of the Issuer's book value of assets as of the end of the last completed quarter preceding the date of the security provided: **no such security was provided.**

2.3.4. Miscellaneous liabilities

Deals concluded by the Issuer, including forward transactions that were not reported in its balance sheet, but may exert substantial influence on the Issuer's financial status, its liquidity, sources of financing and conditions of their raising, results of operation and expenses: **there are no such deals.**

2.4. Purposes of securities offerings and areas of use of the funds raised from placement of issue securities.

In the 3rd quarter 2007 the Issuer didn't accomplish placement of the securities through subscription.

2.5. The risks arising from acquisition of placed issue securities

Uralsvyazinform operation results are affected by a number of factors that can hardly be controlled by the Company. Though many of them are of macroeconomic nature and affect all

companies around, particular spheres of business may tend to be more susceptible to certain risks. The list of risk factors given below is not exhaustive, as there is a variety of factors that may seem negligible at present, but in future appear to exert considerable negative influence on the Company's activities, which would negatively affect its sales volume, profit, assets, capital, liquidity, and paying capacity.

2.5.1. Industry risks

Consequences of potential aggravation of situation within the industry the Issuer operates in. Most significant alterations, as regarded by the Issuer, which may occur in the industry, and assumed actions of the Issuer in case of their occurrence:

Regulatory developments, enhancement of competition due to the impact of various factors on telecommunications market may result in the risk of the decrease of revenue and profit growth rates.

To compensate for the negative impact of the above-stated factors, the Issuer intends to enhance the quality of services rendered, to implement service packaging, to render converged and value-added services. Besides, the Company plans to implement the Quality Management System in accordance with ISO 9000 standards (version as of 2000).

Risks pertaining to potential change of prices for raw materials or services utilized by the Issuer in the process of operation, and their influence upon operation and discharge of obligations on securities by the Issuer:

Risks pertaining to the growth of prices for the outside organizations' services utilized by the Company are negligible, as the growth may be compensated by increase of prices for the services rendered by the Company. In this case the competitive position of the Company shall not suffer considerable changes as the respective growth of prices shall be characteristic of the Company's competitors as well. Still, the Company envisages the opportunity to purchase the outside organizations' services at the competitive market to minimize the risk considered.

Risks pertaining to potential alteration of prices to the Issuer's services and their impact on the Issuer's operation and discharge of obligations on securities:

Since February 1, 2007 the time-based charging for local services was forced into application. It resulted in increase of tariffs for local services by 13 per cent. This fact exerted negative influence upon subscriber base formation, and caused the growth of churn rate. Tariffs for intra-zone services were not altered.

In the current year there exists the risk of temporary decrease in the Issuer's income caused by the fact that according to the Connection Agreements the Issuer pays for the connections starting from the first second, while its subscribers still pay starting from the sixth second (in mobile and fixed networks). At the same time, due to the alterations in the Rules for connection and inter-action of carriers, the Issuer may appear to obtain extra income because of potential reduction of volumes of unauthorized traffic utilized by alternative operators.

As a whole, the influence of industry risks upon the Issuer's operation is regarded as moderate, because due to the merger with regional operators, the Company proved able to utilize integrated infrastructure and technical base within the Urals Federal District of the Russian Federation, which makes it possible to provide the customers with the widest range of services within the Urals Federal District and to develop interregional telecommunications networks for reduction of cost and enhancement of efficiency of services.

2.5.2. Sovereign and regional risks

State in which the Issuer is registered as a tax-payer and performs its core activities, provided that such activities has constituted 10 or more per cent of its profit as of the last completed reporting period preceding the end of the last reporting quarter: **the Russian Federation.**

Region of operation: **Perm Region and Urals Federal District.**

Risks pertaining to the political and economic situation within the country and the region, where the Issuer is registered as a tax-payer and/or performs its core activities:

- **elections to the State Duma to take place in 2007;**
- **elections of President of the Russian Federation in 2008;**
- **entrance of the Russian Federation to the World Trade Organization;**
- **general economic situation within the country and region.**

Assumed measures to be taken by the Issuer in case of negative impact caused by the change of political and economic situation in the country:

- **optimization of expenses by means of revelation and utilization of inner reserves and resources;**
- **adjustment of investment policy;**
- **enhancement of receivables turnover by tightening of discipline of payments to debtors.**

The Issuer shall discharge its obligations using its own profit or by means of raising short-term loans, if necessary.

As a whole, in the midterm the Issuer reckons that considerable negative impact of sovereign and regional risks upon the Issuer's activity is improbable.

Risks pertaining to probable military conflicts, announcement of the state of emergency and industrial strikes within the country or region of the Issuer's domicile:

Risks of military conflicts, announcement of the state of emergency and industrial strikes within the country or region of the Issuer's domicile is regarded as insufficient so as to consider these risks as able to substantially affect the Issuer's activities. Such opinion is affirmed by the current credit rating of the Russian Federation that is being permanently increased.

In 2008, due to the forthcoming RF President elections, there exists the probability of aggravation of political and social situation in 2008 brought on by the political parties. To prevent the strikes, the Issuer creates favorable labor conditions and discharges all obligations to the employees.

To minimize the risks of terrorist attacks and emergency situations the Issuer undertakes additional safety measures for employees and their families.

Risks pertaining to the country and region geographic position:

Risks pertaining to the geographic features of the region, including natural disasters and risks of potential breakdown in transport connection due to the remoteness of the region, are considered as minimal. Such risks are subject to insurance.

2.5.3. Financial risks

Risk of interest rates fluctuations:

The alteration of situation at the world and local financial markets, as well as the monetary policy within the country, may lead to the growth of interest rates on loans resulting in the growth of the Issuer's expenditures.

Currency risks:

Provided that as of 10/01/2007 95 per cent of the Issuer's debts are denominated in Russian rubles, currency risks are not likely to affect substantially the financial status of the Company.

Assumed measures to be taken by the Issuer for neutralization of negative impact of currency rates or interest rates fluctuations:

- **optimization of costs, including reduction of expenses on salaries if necessary;**
- **reconsideration of investment policy;**
- **enhancement of working capital efficiency.**

Potential influence of inflation upon the payments on securities; critical point of inflation in the Issuer's opinion; assumed measures to be taken by the Issuer to decrease the risk of inflation:

According to the official data, inflation level in Russia made up 11.7% in 2004, 10.9% in 2005, 9% in 2006. In the second half-year 2007, the growth of inflation was observed, that reflects the world tendency for the growth of prices for food commodities. To reduce inflation rate, the Russian Government is developing the series of measures aimed at getting over the effects of local monopolism and stimulation of the growth of production. By estimate of the RF Government, in 2007 the inflation shall total 9-10 per cent.

Disinflation along with the retention of economic growth shall facilitate further growth of the real income of the population and corporate sector and, consequently, shall lead to the increase of communications services consumption.

The increase of inflation growth rate may, to the contrary, lead both to the decrease of communications services consumption, and to the growth of the Issuer's expenses, and borrowed funds costs. It may also result in the decrease of profitability index. Thus, in case of inflation substantially exceeding the level forecast by the RF Government (amounting at 30-40 per cent a

year), the Issuer shall take the following measures:

- restriction of cost escalation,
- reduction of debts receivable and cut down of debt outstanding period;
- increase of debts payable up to the optimal level;
- liquidation of redundant free cash flow;
- diversification of investment portfolio.

Items of the Issuer's financial statements most subject to above stated financial risks:

In the Issuer's opinion, profit and cost of services are mostly subject to the financial risks.

Probability of financial risks (dramatic fluctuations of currency rates, inflation, and growth of interest rates) in the nearest future is regarded as low. However, in case of their occurrence, the Issuer may compensate for these risks by increase of tariffs and reduction of loan volumes.

2.5.4. Legal risks

As the Issuer doesn't export its services, only internal legal risks are considered in this section. Legal risks, pertaining to the Issuer's activity, are specific of a number of Russian companies, and may be regarded as sovereign risks.

Risks caused by alterations in tax legislation:

Tax Legislation of the Russian Federation allows for diverse interpretation and is subject to the frequent amending and alteration. Russian community thoroughly follows current changes in the tax legislation, and pays much attention to the workshops and conferences attended by the leading experts in the sphere of taxation.

Recent trend of events in the Russian Federation proves that the tax authorities may take a tough line in interpretation of tax legislation and tax computations. As a result, the Company may be presented with claims on those deals and accounting methods on which there have not been any claims before. Thus, the Company may be charged with extra taxes, penalties and fines. Tax inspections may cover three calendar years preceding the year of inspection. In certain cases inspection may be performed with regard to the earlier periods.

As for the Company's chief officers, the relevant legislative provisions have been interpreted correctly by the Company as far, and it is most likely that the Issuer would preserve its position as a law-complying company in future.

Existing overpay on the majority of taxes as of September 30, 2007 speaks for the bare possibility of taxation risks emergence.

Risks pertaining to the alterations in the currency control, customs surveillance and imposts:

Uralsvyazinform has stable partnership with foreign suppliers of equipment, who are the leaders at the world market of communications equipment.

Due to the fact that communications equipment market is the buyer's market, Uralsvyazinform has the prerogative to choose the contractors and determine principles and conditions of collaboration with them.

One of the principles applied by the Issuer when purchasing foreign equipment is the acquisition of the uniform equipment from the range of the leading producers, provided that such equipment is compatible with each other. This principle allows to purchase the equipment from any other manufacturer in case of deterioration of pricing policy or operation conditions of any of the suppliers.

Value of foreign equipment supply contracts concluded by Uralsvyazinform is denominated either in US Dollars or in Euro. Thus, the main risks pertaining to the Company's external economic activity are the risks of dramatic fluctuations of exchange-value of ruble towards the world currencies (US Dollar, Euro).

As far as the external and internal currency policies undertaken by the Government facilitate stabilization of ruble exchange value, the risks of dramatic fluctuations of exchange-value of ruble towards the world currencies tend to be minimizing.

In recent years, the Government policy has been aimed at liberalization of currency and customs legislation.

Since 1 January, 2007, all restrictions over Russian enterprises' activities imposed by Currency Regulation and Control Law dd. 10 December, 2003 # 173-Φ3 were withdrawn. According to the announcements of the Russian Federation Government and Central Bank, there are no plans on stiffening of currency control measures.

Since 24 April, 2006, customs duties for several types of goods imported to the Russian Federation were temporarily canceled. The list of these goods includes some types of communications equipment purchased by Uralsvyazinform. Since 1 January, 2007 these duties were

canceled on the permanent basis.

Thus, at present Uralsvyazinform currency and customs risks are regarded as minimal.

Risks pertaining to the alterations in the state requirements to the Company's core activities licensing:

Risks pertaining to the alterations in the state requirements to the Company's core activities licensing are regarded as low. There haven't been any amendments to the legislation within the reporting period.

Risks pertaining to the alterations in the court practice:

Despite the fact that the Russian legal system doesn't imply Case Law, court practice holds much significance in the law enforcement system. Judicial Acts, though not being sources of law in the proper sense of the word, in certain cases may assume liability to interpret legal norms being applied. Information letters of the of the Russian Federation Supreme Arbitration Court Presidium, Supreme Court Decrees, Constitutional Court Decrees are obligatory for application by the judicial bodies.

Provided that the Issuer operates in strict compliance with the current legislation, negative impact of alterations within the court practice is likely to come out only in case that the regulatory authorities would change their positions or in case that the Issuer would operate under contempt of the law.

2.5.5. Risks pertaining to the Issuer's operation

Risks pertaining to the Issuer's participation in trials and litigations:

The Company is involved in several arbitration proceedings. One of the most substantial proceedings capable of exerting influence upon the Company's financial status is the Decree #12 dd. 12/01/2006 by Inter-district Inspectorate #7 of the Federal Tax Service. According to the Decree, the Company was charged with extra taxes amounting to RUR 561,332,037.86, penalties amounting to RUR 107,358,263.81, and fines totaling RUR 87,685,697.28 for the years 2003-2004.

The Company filed the claim to the Moscow City Arbitration Court on invalidation of above-mentioned Decree of the Federal Tax Service.

By the Decree of the Moscow City Arbitration Court dd. May 23, 2007 with regard to the claim # A40-77769/06-75-465, the Company's claim was satisfied partially. Decree #12 by Inter-district Inspectorate #7 of the Federal Tax Service was ruled illegal with regard to the extra taxes at the amount of RUR 402,379,281.83, fines and penalties at the amount of RUR 159,125,269.19. Other parts of the Claim are dismissed.

The Company intends to appeal the Court's Decree.

Risks pertaining to circumstances preventing the Issuer from prolongation of licenses for certain kinds of operations or utilization of objects completely or partially removed from trading circulation (including natural resources):

Risks of failure in licensing are low, because the Company complies with all the requirements and rules in its activities.

Risks of the Issuer's responsibility over the third parties debts (including the debts of subsidiaries):

The Issuer bears the risks of responsibility over the third parties' debts amounting to the sum of securities provided to them.

As of 09/30/2007, the total sum of the Issuer's obligations over the third parties' debts appearing from the security provided to them made up RUR 2,524,179.4 thousand.

The Issuer regards such risks as low.

The Issuer has 1 subsidiary. The Issuer's responsibility over the debts of its subsidiary may occur in case the Issuer, by its orders obligatory for execution by the subsidiary, would cause losses or bankruptcy of this subsidiary. The Issuer endeavors to prevent such a situation, as its occurrence would contradict the main objective of the Issuer's activity – making a profit.

Risk of the loss of customers, supplying the sales turnover that constitutes at least 10 per cent of the overall sales revenue:

There are no such customers. Factors that may negatively affect the Issuer's sales volume are set forth in the item 3.2.4. of the present Quarterly Report.

2.5.6. Bank risks

The Issuer doesn't bear bank risks, as it is not a credit institution.

In 2007 the Program of Uralsvyazinform development for 2008-2012 was developed.

Strategic target of the Issuer for 2008 – 2012 is the growth of its business value by means of:

- **retention of the market share occupied;**
- **growth of operating efficiency;**
- **reduction of debt load;**
- **growth of average revenue per line;**
- **growth of lines per employee;**
- **digitalization of Automatic Telephone Stations up to 100 per cent by 2010.**

To achieve the strategic objectives, the Issuer endeavors:

- **to develop services based on the accrued subscriber base;**
- **to reduce the costs;**
- **effective management of the Company's real-estate.**

The Company's long-range budget for 2008 – 2012 included into the Program of Uralsvyazinform development for 2008-2012 confirms the efficiency of strategy chosen.

Standards (Rules) according to which the financial statements and calculations stated at the present item of the Quarterly Report were compiled:

Financial statements were compiled pursuant to the applicable Rules of accounting and reporting, set forth by the Federal Law "On accounting" and Regulations on accounting approved by the Russian Federation Ministry of Finance.

Meaningful new services offered by the Issuer at its core activity market (provided that the information on such services is open to the public):

1. Intelligent network (IN)

Intelligent network services are rendered to Uralsvyazinform fixed line subscribers on the basis of A8690 OSP2.3/IN platform being manufactured by ALCATEL since 2000. In the present-day configuration the system is capable of the following volumes of services:

- FreePhone services and PaidPhone services – 5 000 subscribers;**
 - Televoting – 500 subscribers;**
 - Prepaid Card Calling / Pay Card Calling – 2 000 000 card accounts.**
- System capacity – upwards of 32 CAPS.**

The platform is designed to service calls over the whole territory of the Company.

To render IN services to the GSM mobile network subscribers, OJSC 'Uralsvyazinform' put in operation 2 mobile IN platforms:

- in Perm city IN platform produced by Comverse Ltd., with the capacity of 3 000 000 subscribers,**
- in Chelyabinsk city IN platform produced by ALCATEL, with the capacity of 800 000 subscribers.**

Main type of services provided by the platforms is the prepaid services. Prepaid services are now available for the subscribers in the Perm, Kurgan, Sverdlovsk, Tyumen and Chelyabinsk regions. With the mobile IN Comverse platform, prepaid service subscribers gained access to data transfer services and Internet access (MMS/WAP/GPRS) with online charging.

2. Multi-service networks and broadband access

Multi-service networks and broadband access are basis for all types of new services. New designs are being developed and implemented to enhance long-distance and local channels capacity; ADSL/ADSL2 optical network is being extended; new practice of service quality maintenance is being developed and implemented for various types of traffic; unification of services provision procedure is performed.

In 2007 the Company is going to arrange the test zones for GPON, VDSL2 technologies. Implementation of such technologies shall allow for more diverse range of services.

3. Next Generation Network

In 2005 the first stage of Next Generation Network construction was successfully completed in Yekaterinburg and Chelyabinsk cities.

At present the NGN is being loaded with customer-attractive services. Particularly, broadband network subscribers shall be provided with video-conference, interactive communication, instant messaging services. Mobile and fixed-line subscribers shall be provided with convergent services and mobility services. The first NGN service such as the 'Single number' has been put into commercial operation over the whole area of the Company's activity.

4. Triple Play (voice, video, and data transfer)

New broadband services such as IP TV, VoD are being implemented over the whole area of Inter-Regional Telecoms operation. The main difference of these services from their major peer – cable TV – is their interactivity with the subscriber.

5. Packet switched network and MMS/WAP/GPRS(Internet) services

At present the area of the Company's operation is furnished with 2 platforms of packet switched data:

– GPRS platform manufactured by Huawei with the capacity of 400 000 subscribers. The platform is located in Perm city and maintains the Perm, Sverdlovsk, Chelyabinsk, and Kurgan Regions; its capacity is 40 000 simultaneous GPRS sessions;

– GPRS platform manufactured by Ericsson with the capacity of 110 000 subscribers. The platform is located in Tyumen city and maintains the Tyumen Region, Khanty-Mansyisk and Yamalo-Nenetsk Autonomous Districts.

MMS platform manufactured by Ericsson is located in Perm city within Uralsvyazinform integrated mobile GSM network. Capacity of MMS platform is 500 000 subscribers, performance is 25 MMS per second.

The platform enables GSM subscribers to exchange multi-media messages, both between mobile terminals, and between the mobile terminal and electronic mail terminal.

WAP platform manufactured by Ericsson is located in Perm city within Uralsvyazinform integrated mobile GSM network. Its design capacity is 320 references to WAP sites per second. The platform shall enable GSM subscribers to utilize WAP-resources of mobile Internet through the Packet switched data technology. In the III quarter 2006 the capacity of the platform was increased up to 570 transactions per minute.

In 2007 the Company projects to install distributed GPRS platform and extend the packet switched network, which would add capacity for new GPRS connections and enhance the quality of services. The Company intends to extend WAP platform as well.

6. Information and entertainment services

Information and entertainment services are rendered on the basis of SPACE platform installed in Perm city. Platform capacity is 50 requests/responses of entertainment content per second. This platform allows rendering diverse information and entertainment services through several content-providers. The choice of this platform is also determined by availability of a wide range of content delivery transport (USSD, SMS, WAP, MMS).

SIM-services are rendered through GSM browsing technology JUST produced by 'Berkut' company. The use of SIM-cards' facilities in conjunction with USSD-transport allows to provide the subscribers with cost-efficient and functional access to all network services and put in the new services with their description displayed immediately in the subscriber terminal menu. The capacity of JUST platform is 30 transactions per second over USSD protocol.

In the II quarter 2006, the centralized CRBT – Color Ring Back Tone platform was put into operation. This platform allows the destination subscriber to choose any ring signal to be heard by the calling subscriber. The service is provided through the equipment produced by a domestic company 'Berkut'.

In 2006 Multi Media Streaming platform was put into operation. This platform allows the GSM/GPRS subscribers to get stream multi-media services and load video content by request.

Currently the Company upgrades SPACE platform in order to transmit content through Cell Broadcast and involve new content-providers; broadens Cell Broadcast Centers in Perm and Ekaterinburg cities; establishes Call Catcher platform (Voice mail, Voice SMS&MMS etc.); upgrades SW 5.0 IN Comverse version; establishes Multimedia Instant Messaging (MIM) platform; establishment of ECDS platform.

7. Call centers

At present, the call centers are established in all regional divisions of the Company.

A wide range of services is being rendered on the basis of the call-centers: Information and Directory Service, outsourcing, subscribers' support, and fee-based information and entertainment services.

One of the call centers' prospective services is the 'Virtual Secretary' service combining the following options: processing of mass calls, voice mailing, auto informer etc. Call centers are also regarded as a potentially new service to be developed under the NGN technology.

8. Subscribers' self-service

At present, an integrated system of subscribers' self-service is operating within the GSM networks of Perm, Sverdlovsk, and Tyumen Region, based on CaReM technology produced by 'Berkut' company.

CaReM system operates with all existing access channels: IVR, SMS, USSD, WAP, WEB. This system allowed to increase the level of subscriber service and to reduce staffing of service centers. The system allows the mobile subscribers to perform changes of their service profiles and necessary payments.

In May 2006 the Integrated Payment System was put into operation through the 'Kiberplat', 'E-port', 'Rapida' payment portals, which made it possible to perform payments over the whole territory of the country. This system is also designed to enable bank settlements for mobile services.

Currently the Company increases the capacity of USSD transport system to extend the range of added value services and subscribers' self-services, and to widen CaRem platform by 50 sessions per second.

3.2.3. Raw materials and suppliers of the Issuer

Issuer's suppliers that provide at least 10 per cent of raw materials supplies, and their share in overall supplies volume as of the 3rd quarter 2007:

Company name	Domicile	Share in overall supplies volume as of the 2 nd quarter 2007, %
Limited Liability Company 'Tekhnoserv AS'	10, building 3, Smirnovskaya ul., 109052, Moscow, Russia	32

Share of import in the Issuer's supplies of commodities as of the 3rd quarter 2007: **0%**.

Change in prices for raw-materials within the reporting period as compared with the respective reporting period of the previous fiscal year: **total share of raw-materials, fuel and energy makes up nearly 10 per cent of the Issuer's cost value. In the 3rd quarter 2007 there were no substantial changes in prices that could affect considerably the financial state of the Issuer.**

Availability of commodity stocks and supplies in the future: **the Issuer maintains stable partnership with the suppliers.**

3.2.4. Market outlets of the Issuer

Main market segments the Issuer operates in:

Uralsvyazinform renders services over the Urals Federal District and Perm Region of the Russian Federation.

Basic market segments:

- **local telephone services;**
- **intra-zone telephone services;**
- **Internet services and data transfer;**
- **mobile telephone services.**

Negative factors affecting Issuer's sales:

Up to the end of 2007 the Issuer does not anticipate essential risks in services sales within the communications industry. More urgent are the risks pertaining to the amendments in Legislation:

- **inclusion of the cost of calls from the public network to mobile phones into the "Subscriber tariff plan" may lead to the loss of income and decrease in profit;**
- **the transfer to per-second charge of local telephone connections may lead to the decrease in volume of local traffic consumed and loss of revenues from local services up to 10 per cent;**
- **the decrease in minute price at the interconnect market may result in reduction of the Company's revenues;**
- **implementation of time-based charging system may lead to the short-term slowdown of growth of ARPU and revenues from local services. The growth rate shall restore with the growth of mobile network ARPU.**

The Company also anticipates the risk of displacement of the fixed services by the mobile services within its business.

Besides, telecommunications industry is characteristic of impetuous emergence and implementation of new products and technologies, and further updating of existing products and services. The negative factor here is the difference in advertising budgets and advertising activity of the federal telecommunications carriers (especially mobile operators) operating at the territory of the Urals Federal District and Perm region.

Issuer's activities aimed at reduction of negative factors' impact:

- **advancement of the range of services;**
- **implementation of next generation technologies;**
- **improvement of services quality;**
- **enhancement of the managers' qualification;**

- *monitoring of peers' activity, prompt reaction to developments revealed;*
- *optimization of production and technology processes;*
- *reduction of products cost;*
- *distinct reasoning of prices formation when reporting to Regulatory authorities;*
- *development of high-profitable new services;*
- *offering of flexible-choice service packages;*
- *development of outsourced sales structures;*
- *continuation of competitive tariff plans development;*
- *increase in advertising and marketing budgets.*

3.2.5. Licenses granted to the Issuer

3.3. Issuer's Prospective Plans

Issuer's prospective plans on implementation of new services:

The Company shall further develop broadband access networks on the basis of different technologies (xDSL, FTTx, Fast Ethernet, WiFi, WiMax etc.) in order to provide access to a majority of added-value services and diverse content.

The Company is going to gradually transform its diverse-traffic networks into a single integrated NGN-network comprising both fixed and mobile network segments. This shall enable the Company to expand the range of subscriber services and give opportunity to the subscribers to configure their own personally-suitable service packages.

The Company shall further develop broadband access networks on the basis of different technologies (xDSL, FTTx, Fast Ethernet, WiFi, WiMax etc.) in order to provide access to a majority of added-value services and diverse content.

Issuer's prospects with regard to the expansion or reduction of production:

The Issuer is not about to reduce production.

The Issuer shall be expanding the range of broadband access services using NGN technologies and further developing added-value services.

Issuer's plans on development of new services:

- ***rendering services of GSM-standard cellular network;***
- ***development of broadband access services;***
- ***development of service packages, including dynamic packages;***
- ***development of convergence services;***
- ***development and promotion of multi-media services on the basis of NGN-network over the whole area of the Issuer's operation;***
 - ***rendering services of intellectual network over the whole area of the Issuer's operation (televoting, FreePhone, PaidPhone, personal number).***
 - ***rendering content and advertising services;***
 - ***development of Call-centers and services on their basis;***
 - ***implementation of fee-based television broadcasting through IPTV technology.***

Detailed information on the new services is given in item 3.2.2 of the present Quarterly Report.

Issuer's prospective plans for upgrade and reconstruction of fixed assets:

In 2007 the Company plans to allocate RUR 240,142 thousand for upgrade and reconstruction of fixed assets. The funds allocated for upgrade and reconstruction shall be utilized as follows:

- ***optimization of the Issuer's co-operation with other operators, including upgrade of Automatic Trunk Exchange to ensure the subscriber's option to choose a long-distance operator and to chose a convenient payment system (capital investments volume: RUR 157,309 thousand);***
- ***reconstruction of documentary telecommunications network (capital investments volume: RUR 43,358 thousand).***

– *upgrade of Automatic telephone stations (capital investments volume: RUR 39,475 thousand);*

Issuer's plans on potential change of core activities: *the Issuer isn't going to alter its core activities (rendering telecommunications services).*

Economic analysis of the Issuer's cost effectiveness based on the dynamics of indices denoted. Reasons for profit/loss shown in the financial statements:

In the 3rd quarter 2007 the Issuer's revenues increased by 12% as compared with the 3rd quarter 2006 and totaled RUR 9 917.93 mln.

Gross profit as of the 3rd quarter 2007 totaled RUR 2 406.3 mln. Growth to the comparable last year's period by 9% was caused by the growth of the sales revenues.

Net profit as of the 3rd quarter 2007 increased by RUR 259,244 mln. to the comparable last year's period, which resulted in considerable growth of Return on Equity, Return on Total Assets, and Net Profit Ratio.

The decrease in Cost to Revenue rate is caused by outrunning growth of revenues as compared with the sales profit (for the period from September 30, 2006 to September 30, 2007 revenues increased by 12%, sales profit by 9%).

Increase in Turnover of Capital is caused by the growth of revenues.

The Company's profitability, as a whole, proved to be sufficiently high as of the last reporting date.

4.1.2. Factors causing the change of Issuer's sales revenue and Issuer's profit (loss) on ordinary activities

1. In the 3rd quarter 2007 the growth of sales revenues as compared with the 3rd quarter 2006 totaled 112%, overall growth totaled RUR 1,059.4 mln.

Own funds autonomy ratio	(Capital and reserves (with repurchased stock excluded) – Target Financing + Deferred Revenues) / (Fixed Assets + Current assets)	0.38	0.39

Economic analysis of the Issuer's liquidity, paying capacity, and capital adequacy based on the dynamics of indices denoted above:

Deficit of own current assets is the reflection of the current situation with all Svyazinvest holding's companies. It shows that the investments of the Company are partially financed by means of the raised funds. At present the Company's policy is aimed at financing of capital investments by means of its own funds.

Factors that caused the change of any of the denoted indices by more than 10 percent as compared with the respective preceding reporting period:

The decrease of Current liquidity ratio from 0.51 in the 3rd quarter 2006 to 0.41 in the 3rd quarter 2007 is caused by the growth of short-term debts on loan facilities.

4.3. Amount and structure of the Issuer's capital and current assets

4.3.1. Amount and structure of the Issuer's capital and current assets

4.4. Policies and expenses of the Issuer to the science and technology, licenses and patents, research and development

Issuer's policies in the sphere of R&D in the 3rd quarter 2007:

The Issuer doesn't perform research and development by itself. All R&D works are performed by outside organizations (Federal State Unitary Enterprise 'Central Scientific Telecommunications Institute', Federal State Unitary Enterprise 'Leningrad Industrial Scientific Telecommunications Institute'; Open Joint-Stock Company 'Algorcom' etc).

The Company makes capital investments in advanced high-tech projects for telecommunications networks development, these are:

- cable television;
- upgrade of telephone network using NGN technology;
- creation of packet switching network on the basis of multi-service network;
- development of optical networks providing broadband and multi-service access;
- intra-zone and radio-relay transport networks;
- wireless access systems;
- mobile telecommunications networks of GSM-900/1800 standards;
- Internet;
- intellectual network.

Results of the use of the trademark Utel by the Issuer:

In the 3rd quarter 2007 specialists of the Company's commercial sector in collaboration with the advertising and media agencies operating over the territories of the Company's subdivisions developed creative conceptions for the promotion of priority services (traditional services, mobile services, new services).

In the 3rd quarter 2007 the following promotion actions and tariff proposals aimed at the raise of subscribers' loyalty and sales revenues were realized under the conception of Utel trademark development:

1) services

- *Waiting-for-the-call («Жду звонка») (avails the subscriber with a zero-balance account to send a free SMS requesting to make a call to his/her number);*
- *free activation of GPRS-services (GPRS/MMS/WAP);*
- *opportunity of SMS-exchange with the subscribers of CDMA-standard mobile operators;*
- *'SMS to e-mail';*
- *GPRS-roaming with a range of national and foreign mobile operators (for example, 'Megafon', 'Vodafone'-Italy, «Du» (UAE), 'Roger's Wireless Inc.' (Canada);*
- *'Voice message'.*

With the start of the holiday season the sales of roaming SIM-cards were initiated.

2) promotion actions and tariff proposals

- *'Write more' («Пешу уччо☺») (twofold reduction of price for outgoing SMS in several tariff plans);*
- *'You should see this' («Это надо видеть!») (twofold reduction of price for outgoing MMS);*
- *'5 years together' («5 лет вместе») (action aimed at reduction of the cost of connection to a number of tariff plans);*
- *honoring of the 500-thousand's subscriber of Utel in Sverdlovsk region;*
- *regional actions on reduction of cost of connection and tariffs over the range of tariff plans (for example, tariff plan 'Pioneer').*

The above-named measures ensured effective dynamics of sales revenues from mobile services under the trade-mark Utel.

4.5. Trend analysis of the core business of the Issuer

The main trends of telecommunications industry development:

Telecommunications is one of the most swiftly developing industries in the Russian economy. In 2006 earnings within the industry totaled 783.6 bln (growth by 26.6% to 2005). As calculated in current scale of prices, growth rate for the last 5 years made up 132.52% (in 2002 it totaled 273.2 bln

RUR; in 2003 – 395.6 bln RUR; in 2004 – 540.3 bln. RUR, in 2005 – 660 bln RUR).¹ In 2006 the share of telecommunications industry in GDP structure totaled 3%.

Within last years the structure of industry earnings has undergone certain changes: the share of earnings from mobile services has been growing considerably, while the share of earnings from fixed-line services has been decreasing.

One of the main trends of telecommunications industry development is its liberalization. Lately, newly-developed and adopted Acts were brought into action, aimed at liberalization of the industry and empowerment of customers. Due to the innovations described, long-distance market has been demonopolised.

Telecommunications market is getting more and more competitive. Swiftly developing mobile communications market comes to maturity. Telecommunications operators are looking for the new opportunities for growth and find them in development of broadband access and broadband-based value-added services. They invest money in the development of NGN networks and broadband 'last mile'.

Main factors affecting the situation within the telecommunications industry:

- changes in the state regulation of the industry (price formation policy, availability of licenses, state reforms);
- general state of the country' economy;
- development of new technologies.
- changes in requirements and preferences of the customers as a consequence of emergence and development of new technologies and alteration of economic environment.

Estimated results of the Issuer's operation in telecommunications industry:

Generally, in the 2nd quarter 2007 the Issuer obtained positive operating results, having enhanced revenues on telecommunications services by 19% as compared with the 2nd quarter 2006. Growth of revenues is caused by the growth of service volumes, active development of xDSL Internet services, inflow of fixed and mobile subscribers, and growth of subscribers' interest to additional services.

Growth of the Issuer's income from major lines of business:

- Internet – 172%;
- GSM-standard mobile services – 133 %;
- local services – 105 %.

Compliance of the Issuer's operation results with the trends of the industry development:

In the 2nd quarter 2007 the growth of income on telecommunications services within the industry totaled:

- Internet – 155%;
- GSM-standard mobile services – 142%;
- local services – 104%.

4.5.1. Analysis of factors and conditions affecting Issuer's activity

3	Economic status of the country and region, level of public prosperity	Change in demand for telecommunications services	Constant	Positive dynamics of economy development and growth of population prosperity facilitate the growth of demand for telecommunications services, including new services	The Issuer intends to develop new services (primarily, broadband access and convergence services)
4	Market competition	Growth of competition causes the decrease of margin and emergence of additional expenses for marketing and sales promotion	Constant	Restriction of income base growth potential due to the growth of tariffs; growth of expenses for marketing and sales promotion; need for costs reduction	The Issuer undertakes measures on costs reduction, including the use of outsourcing; the Issuer plans to fill the market with unique products protected from copying by the competitors
5	Growth of influence exerted by the customers	Necessity of investments in the quality of client services	Constant	Necessity of investments in the quality of client services ensuring the loyalty of customers	The Issuer plans to certify its quality management system under ISO 9000 standards.
6	Shift in customers' needs and preferences	Necessity of investments in development of new technologies and services	Constant	Shift of the product life style	The Issuer is currently expanding and strives for future expanding of the product portfolio. Thus, the Issuer plans to alter the income structure by increasing of share of profit-making services.

4.5.2. Peers

Main existing and assumed competitors of the Issuer in core fields of activity:

In local services market of the Urals Federal District (including Perm region) there are no strong competitors to the Issuer. In the 2nd quarter 2007 the share of income in local services market made up 82% over the Issuer's area of operation.

Tough competition exists in mobile communications sector, where the Issuer competes with federal-scale operators.

Main peers of the Issuer (mobile services):

Operators	Share of income from telecommunications services (2 quarter 2007)
OJSC 'Uralsvyazinform' (under Utel trade mark)	42%
Total share of other operators, among which:	58%
OJSC 'Mobile TeleSystems' (MTS)	18%
CJSC 'Urals Mobile Networks' (Megafon)	20%
OJSC 'Vostok-Zapad Telecom' (BeeLine)	10%

In the 2nd quarter 2007 the share of the Issuer's income from Internet services made up 55%. Among its main competitors there are both national and local operators.

In spite of the tough competition and absence of the license for long-distance services since January 1, 2006, Uralsvyazinform has been retaining leading positions on telecommunications market in the 2nd quarter 2007. The share of the Issuer's income from telecommunications services in the Urals Federal District (including Perm region) made up 52%.

Services	Share of Uralsvyazinform's income from telecommunications services (2 quarter 2007)
Local services	82%

Long-distance/international/intra-zone services	39%
Mobile services	42%
Internet and data transfer	55%

Factors facilitating the Issuer's competition:

- **availability of all types of the 'last mile';**
- **well-developed network infrastructure;**
- **well-developed service and sales network;**
- **wide range of services;**
- **capability of rendering local and mobile services;**
- **possibility of rendering bundled services;**
- **promotion of bundled services based on a dominating service within the package;**
- **possibility of concentration of 80% of the local traffic in the domestic network**
- **availability of inter-regional intellectual fixed-line platform and pre-paid mobile communications platform;**
- **good relations of the Issuer with the government authorities;**
- **competitive pricing;**
- **high level of credence from the citizens and business sector;**
- **Issuer's geography of operation: operations over the regions with high-yield subscribers (Khanty-Mansyisk, Yamalo-Nenetsk Autonomous Districts and Sverdlovsk Region).**

Main competitive advantages of the Issuer are based on effective use and development of the 'last mile', network and infrastructural resources and wide range of services rendered.

Further growth of competitive power shall be provided through:

- **development and upgrade of own telecommunications networks;**
- **business-processes optimization;**
- **new services start-up;**
- **implementation of certification practices aimed at compliance with international and internal quality standards and growth of service quality;**
- **lowering of timeframes for services activation;**
- **implementation of technological innovations;**
- **involvement and training of qualified personnel;**
- **constant enhancement of the Company's efficiency.**

8.8. Taxation of yield on the Issuer's issue securities that have been placed or are being placed

Taxation of yield derived from the Issuer's securities is governed by the Tax Code of the Russian Federation and other legislative Acts adopted in accordance with the Tax Code.

Taxation of yield on the Issuer's shares depending on the category of the shareholders:

1. Individuals – tax residents of the Russian Federation

Individuals' income tax is assessed and paid pursuant to the chapter 23 part 2 of the Tax Code of the Russian Federation adopted as of August 5, 2000, #117-Φ.

Individual persons being Russian Federation tax residents shall pay income tax on the following types of income derived from the operations with the shares:

1) income from shares trading.

– purchase and sale of securities circulating on the organized securities market;

– purchase and sale of securities that are not circulating on the organized securities market.

Income (loss) from purchase and sale of securities is calculated as a difference between the sums derived from the sales of securities and expenses on purchase, sale and storage of securities actually incurred by the taxpayer (including expenses reimbursed to the professional participants of the securities market), provided that such expenses are document supported.

Such expenses include:

– sums paid to the seller of securities pursuant to the Contract;

– charges for the depository services;

– commission fees to the professional participants of the securities market;

– exchange charge;

– register charge;

– other expenses related to the purchase, sale and storage of securities.

Tax rate: 13 (thirteen) per cent.

2) divided yield.

If the taxpayer receives dividend from the Russian organization, such organization shall be regarded as a taxpayer's tax agent and shall calculate the tax sum for each separate taxpayer with respect to each yield payment, at the rate of 9 (nine) per cent.

Tax agents should retain the accrued tax directly from the taxpayer's yield at the moment of its actual payout.

2. Individuals who are not the tax residents of the Russian Federation

Individual persons who are not the Russian Federation tax residents shall pay income tax on the following types of income derived from the operations with the shares:

1) income from shares sales.

2) divided yield.

Tax rate: 30 (thirty) per cent.

3. Legal entities (organizations) – tax residents of the Russian Federation

Legal entities being Russian Federation tax residents shall pay income tax on the following types of income derived from the operations with the shares:

1) income from shares trading.

Tax rate: 24 (twenty four) per cent.

2) divided yield.

Tax rate: 9 (nine) per cent:

The Russian organization, when paying dividend yield to any legal entity, shall act as a tax agent to such entity.

4. Legal entities (organizations) that are not the tax residents of the Russian Federation

Tax rates:

– 15 (fifteen) per cent – for the dividend yield received by non-residents from the Russian organizations;

– 20 (twenty) per cent – for the income derived from the sales of shares of the Russian organizations.

Taxation of yield derived from the bonds depending on the category of the bondholders:

1. Individuals – tax residents of the Russian Federation

Tax rate for the income derived by the individual persons, such as coupon payments, redemption of bonds, or sales of bonds prior to the maturity term, shall be 13 per cent.

2. Individuals who are not the tax residents of the Russian Federation

Tax rate for the income derived by the individual persons who are not the Russian Federation residents, such as coupon payments, redemption of bonds, or sales of bonds prior to the maturity term, shall be 30 per cent, unless otherwise specified in International Treaties for Avoiding Dual Taxation.

3. Legal entities (organizations) – tax residents of the Russian Federation

Tax rate: 24 per cent.

4. Legal entities (organizations) that are not the tax residents of the Russian Federation

Foreign organizations that operate within the Russian Federation though their permanent representative offices shall calculate the tax sums due in an order similar to that set fourth for the legal entities being tax residents of the Russian Federation, taking into account article 307 of the Russian Federation Tax Code.

The tax rate for the foreign organizations that do not operate within the Russian Federation though their permanent representative offices, is 20 per cent. The Russian organization that pays the bonds coupon yield to such foreign organization shall act as its tax agent.

In case there is a Treaty for Avoiding Dual Taxation between the Russian Federation and the state of residence of the foreign company raising the coupon yield, the tax rate shall be set pursuant to the provisions of such a Treaty.
